

Derivatives

DLA Piper's Derivatives practice provides experience across a range of jurisdictions on a wide array of mainstream and specialist derivatives and structured finance products, including stand-alone hedging products and hedging in connection with larger financing transactions.

We advise on the full spectrum of derivatives users, ranging from leading financial institutions to corporates and investment and pensions funds, and have considerable experience acting in a transaction management role or advising compliance in an increasingly challenging international regulatory environment.

CAPABILITIES

Our Derivatives team provides advice on a wide variety of derivatives, including interest rate and currency swaps, credit default swaps, bond financing hedges, guaranteed investment contracts, credit and equity total return swaps, ISDA master swap documentation (1992 and 2002 versions) and credit support documentation.

In addition, we provide advice on equity and equity-indexed swaps, commodity and commodity-indexed swaps, option transactions of all types, forward transactions, prime brokerage relationships, master and global master repurchase and securities lending agreements (whether GMRA and GMSLA versions or locally drafted agreements), cross-netting agreements, credit-linked and other structured notes.

Many of our instructions involve hedging products as part of (and as often required by) larger financing transactions, including securitizations and synthetic structures utilising derivative instruments to transfer risk. Our derivatives lawyers coordinate with lawyers in all areas of the firm to provide maximum value for our clients.

DLA Piper is able to assist clients who are considering the extent they must comply with EMIR, the Dodd-Frank Act and other derivatives regulation around the globe. Our crossborder team can explain the parallels and conflicts between the European and US derivatives regulatory regimes and advise on regulatory developments affecting the derivatives market in many jurisdictions, including Asia.

[FINANCE AND MARKETS GLOBAL INSIGHT SERIES](#)

2018 brings a wealth of regulatory change which has been long in the making and is now finding its way into the law of European Member States, including for the time being, the UK. In this issue we look at the impact of a number of important new regulatory frameworks for capital markets transactions in the EU, including how the securitization regulations will effect CLOs and proposed RTS on risk retention and homogeneity. We also reflect on MiFid II, which came into effect on 3 January 2018 presenting a second overhaul of the European financial system.

FINANCE AND MARKETS GLOBAL INSIGHT SERIES

On 23 June 2016, the UK electorate voted to leave the European Union in a so-called Brexit referendum. The exit result was a surprise for many working in the finance sector. The change will impact the position of the UK under critical legislation such as the Capital Requirements Regulation, European Market Infrastructure Regulation, Market Abuse Regulation and many other Regulations and Treaties applicable in the UK. We will also see a change as to the role of the UK in significant market initiatives such as the Capital Markets Union. It is likely that these changes will present both threats and opportunities. Until policy is clearer, we will comment on some of the existing challenges caused by EMIR and similar EU Regulations.

US and EU reach an important agreement on CCP global equivalence: how will it affect you?

10 MAY 2016

This historic agreement allows market participants to use clearing infrastructures in both the US and Europe and assures a level playing field for US and EU CCPs.
