

Financial Services

DLA Piper advises some of the largest financial services companies and institutions on both their day-to-day operations and wider strategic objectives. Uncertain economies demand legal strategies that address regulatory and enforcement risks and the costs of compliance.

We help our clients contend with legal issues in banking - including restructurings, regulatory demands and the compliance costs that have come with reform.

DLA Piper has the worldwide resources to represent clients in large banking and commercial transactions, as well as to meet their needs in regulatory, public policy and enforcement areas. Our lawyers are located in all major capital markets and in the regulatory centers of Washington, DC and Brussels. We also advise clients on banking legal issues in higher risk and growth markets.

Our clients include asset managers, building societies, capital markets and their participants, investment banks, national regulators, private banks, private equity firms, professional services organizations engaged principally in financial services and retail banks. In addition, we regularly work with retail intermediaries on the legal issues involved in the selling of financial services to consumers.

- SEC investigation: When the former CFO of Countrywide Financial Corporation was involved in a high-profile SEC investigation and lawsuit, our lawyers achieved a rare outcome when the SEC charged fraud, but agreed to a negligence-based settlement
- Acquisition: We are counsel to Banco Santander in its US\$4.1 billion acquisition of Bank Zachodni WBK from Allied Irish Banks
- Refinancing: In the CEE region, advising Deutsche Pfandbriefbank on the €300 million refinancing of a real estate portfolio of office buildings across Poland, the Czech Republic, Hungary and Romania
- Personal Properties Securities Act (2009) (Cth) (PPSA) initiative: With a banking client we initiated a program of workshops for their clients on the potential impact of the new PPSA regime in Australia. The workshops were targeted by identifying those bank clients likely to be impacted, such as manufacturers. Along with representatives of the bank, we provided practical insights into how their businesses would be affected.
- Foreign Account Tax Compliance Act (FATCA): Major global banks will be impacted by the operation of FATCA. Our US practice has been advising both US and ex-US clients and lobbying on behalf of affected parties. Our Australian tax practice and finance partners have worked with the Australian Banking Association to assist in the understanding of the

FINANCE AND MARKETS GLOBAL INSIGHT SERIES

This issue of Finance and Markets Global Insight reflects the ongoing evolution of global financial markets as financiers and businesses continue to grapple with the two key themes of innovation and regulation. There's discussion on the implantation of the revised regulatory framework for derivatives and securitization, as structurers deal with variation margin implantation, and debate around Article 17 of the Securitization Regulation concerning the exclusion of self-certified mortgages. We see how the Nordics are implanting PSD 2 and look at European Central Bank guidance to banks on dealing with non-performing loans. We also weigh up the booming initial coin offerings market, and consider the European Commission's consultation on the impact of FinTech and its role in driving a more competitive and innovative European financial sector. This issue also reports on a new set of framework principles for social bonds to encourage interest in environmental, social and ethically sound investments, the European Union's plan for retail financial services and the FX Global Code. It also brings a US perspective on the risks inherent in trade and commodity finance.

A blockchain overview

19 SEP 2017

In its simplest form, blockchain is a decentralized, distributed ledger on which transactions are anonymously recorded. The transaction ledger is maintained simultaneously across a network of unrelated computers or servers called "nodes", like a spreadsheet that is duplicated thousands of times across a network of computers. The ledger contains a continuous and complete record (the "chain") of all transactions performed which are grouped into blocks: a block is only added to the chain if the nodes, which are members in the blockchain network with high levels of computing power, reach consensus on the next 'valid' block to be added to the chain.

Initial Coin Offerings – something new under the regulatory sun?

7 AUG 2017

An Initial Coin Offering (**ICO**) is a process by which an organisation raises funds, using block chain technology, through the offer and sale of cryptographically secured digital tokens. Purchasers may use fiat currency (such as NZ or US dollars) or virtual currencies (such as BitCoin or Ether) to buy these digital tokens. Once they are issued, the tokens can usually be traded in secondary markets using virtual currency exchanges.
