Blockchain: background, challenges and legal issues

2 FEB 2018

Blockchain and distributed ledger technology offers significant and scalable processing power, high accuracy rates, and apparently unbreakable security at a significantly reduced cost compared to the traditional systems the technology could replace, such as settlement, trading or accounting systems. Like all new technology however, it poses challenges for suppliers and customers. So what are the key issues in relation to blockchain and distributed ledger technology?

This article, and the related infographic, also accompanies another article looking at the transformative impact of technology on retail and the supply chain, the likely reduction in the need for workers, inevitable HR issues that will arise and the dangers of getting 'locked in' to long term contracts in a fast-changing market.

Notice and take-down mechanism on Alibaba ecommerce platforms

7 NOV 2017

In August 2017, Alibaba introduced some technological enhancements to its Intellectual Property Protection Platform (IPP), most of which target the IPP's Notice and Take-down Mechanism (Complaint Mechanism). The enhancements are promising, and strengthen the enforcement tools for rightsholders in Alibaba's increasingly important ecommerce ecosystem. However, some key shortcomings remain. These are discussed below, as well as some tips for how the IPP is best used.

Unexpected Human in the Bagging Area: the impact of automation on retail workforces

27 OCT 2017

I suspect most of us have had the experience from time to time - you're looking to buy something a little bit out of the ordinary, and don't really know where to start. Two stories I heard recently neatly illustrate how that can result in both good and bad experiences. One story involves a teetotal friend looking to buy wine for a dinner party. His trip to a specialist vintner was frustrated by a condescending member of staff and resulted in my friend leaving the shop having not made a purchase. In

contrast, another friend decided to take up running after being on maternity leave. She visited a running shop, was put at ease but a member of the sales team and left with trainers, clothes and gadgets.

A blockchain overview

19 SEP 2017

In its simplest form, blockchain is a decentralized, distributed ledger on which transactions are anonymously recorded. The transaction ledger is maintained simultaneously across a network of unrelated computers or servers called "nodes", like a spreadsheet that is duplicated thousands of times across a network of computers. The ledger contains a continuous and complete record (the "chain") of all transactions performed which are grouped into blocks: a block is only added to the chain if the nodes, which are members in the blockchain network with high levels of computing power, reach consensus on the next 'valid' block to be added to the chain.
