

Intellectual Property and Technology

DLA Piper is one of the most widely recognized providers of a full range of commercial, intellectual property law, privacy, sourcing and technology law services for leading businesses worldwide.

Our lawyers provide both litigation-related (contentious) and strategic commercial advice to a wide range of industry sectors, helping clients from emerging technology and pharmaceutical companies to established banks and financial institutions achieve their objectives wherever they do business.

Our IPT practice encompasses nearly 500 dedicated lawyers in more than 24 countries, with particular strength in key global markets. Intellectual property and technology law is at the core of any major business transaction or strategic dispute and has become one of the most critical legal areas as companies continue to expand and protect their technologies, brands, products, data and services around the globe.

Our group is recognized worldwide by legal directories and industry members as one of the leading groups of its kind, seamlessly combining multi-jurisdictional reach with local knowledge and experience.

The Court of Appeal's ruling confirms their view on the constitutionality of one of CASL's core features, the regulation of commercial electronic messages. In this alert, we take an in-depth look at the court's findings, their implications for future CASL investigation targets, and the specific facts that led to the FCA upholding the CRTC's C\$200,000 fine.

Navigating China Episode 13: (More) Important Developments in China's Privacy and Cyber Laws

10 June 2020

[NAVIGATING CHINA: THE DIGITAL JOURNEY](#)

China's privacy and cyber authorities have been busy in the last month enacting substantial enhancements and clarifications to data protection compliance obligations; and even more changes are expected before the end of 2020.

New Chinese Civil Code Introduces Greater Protection of Privacy Rights and Personal Information

9 June 2020

China's top legislature, the National People's Congress, recently enacted the PRC Civil Code (the Civil Code), which will come into force on 1 January 2021. This first ever "codified" legislation covers a wide spectrum of rights and issues such as property rights, contracts, matrimonial and family law and tort liability.

CFPB provides COVID-19 temporary supervisory and enforcement flexibility for ESIGN compliance for certain credit card transactions

5 June 2020

However, the CFPB statement limits this flexibility to certain circumstances.

California AG posts final proposed CCPA Regulations and offers insights ahead of July 1 enforcement deadline

4 June 2020

With this final statement from the AG's Office, businesses can proceed to finalize their CCPA compliance programs.

BLOCKCHAIN AND DIGITAL ASSETS NEWS AND TRENDS

California may limit application of securities laws to tokens, French court says bitcoins are fungible assets – plus latest legal, regulatory and case law developments.

Quaran-streaming: Music licensing and your online business

15 MAY 2020

The COVID-19 pandemic has caused an unprecedented need for businesses to get creative in order to continue generating revenue while their physical premises are temporarily closed. Certain businesses which have traditionally been based entirely on in-person attendance, such as fitness studios, have been among those experiencing the most pressure to pivot their business models. With many businesses that feature music as a key part of their service now offering virtual classes, seminars, or shows, the question arises — how can businesses move their services online and stay onside of copyright law?

COVID-19: Using technology to address compliance

The Federal Circuit decision changes the rules for adjudging the ability to register color marks.

Paradigm Change in Germany's Foreign Direct Investments (FDI) Law

14 April 2020

Germany's FDI rules so far had a reputation of not being very strong. In the past few years, only three transactions have been prohibited. This is set to change under a new bill.

Episode 12: More obligations on Chinese mobile app operators to comply with

9 April 2020

NAVIGATING CHINA: THE DIGITAL JOURNEY

Following the crackdown by Chinese authorities against non-compliant mobile apps in late 2019 (please see Episode 8 in this series), the authorities have issued a series of app compliance guidelines (including the Guide to Self-Assess Illegal Collection and Use of Personal Information by Apps, Methods for Identifying Unlawful Acts of Apps to Collect and Use Personal Information, and Draft Specification for Collecting Personal Information in Mobile Applications). These guidelines imposed detailed obligations and practical actions to urge mobile app operators to conduct self-assessments and to rectify any non-compliant data processing practices. Organisations may have noted that some of these guidelines contain conflicting requirements.

COVID-19: Agile working across Europe - new arrangements come with increased cyber security risk

7 April 2020

The COVID-19 pandemic has given organisations no option other than to rollout home-working IT solutions if they want to continue

operating. With the rollout of these remote working solutions, at such scale and with such haste, there is a risk with respect to the security of data which must be accessed by a now dispersed workforce.

Contract analysis in a crisis: flowcharts

7 April 2020

Flowcharts providing considerations for analyzing commercial contracts in the context of the COVID-19 pandemic through a logical process flow that can serve as a practical checklist.

A balance between the government, the private sector and the needs of the people: Invocation of rarely used provisions to ensure public safety during the COVID-19 pandemic

6 April 2020

The Defense Production Act, compulsory licensing and march-in rights are means for authorizing the government to step in and assert rights against private companies.

The CARES Act and USPTO patent practitioner deadlines

6 April 2020

While the USPTO remains open for filing of documents and fees, Director Iancu announced that parties may be eligible for extensions of certain deadlines if their inability to meet a current deadline is due to the COVID-19 pandemic.

COVID-19: Impact on Canadian patent owners

3 APR 2020

Canadian patentees should be aware of recent amendments to the *Patent Act* in light of the COVID-19 health emergency. Most current medical technology is protected by patents. However, during emergencies, patent rights must take a back seat to the manufacture and distribution of essential equipment – ventilators, masks, valves, etc. Bill C-13, dubbed the *Covid-19 Emergency Response Act*, received royal assent on March 25, 2020, and covers, among other things, amendments to Canada's *Patent Act* to authorize the use of patented inventions necessary to respond to a public health emergency of national concern.

Coronavirus: 10 tips for contract triage

3 April 2020

The need for contract triage to manage the impact of COVID-19 is inescapable. It can seem a daunting task - knowing where to start, when there is a bewildering amount of considerations, isn't easy. It's further complicated because what to consider in respect of existing contracts isn't always the same as what to consider in respect of new (or re-negotiated) contracts.

Important updates for British Columbia Public Bodies amidst COVID-19 (Canada)

1 APR 2020

In light of the current and developing COVID-19 circumstances, the following alerts have been released for British Columbia Public Bodies, subject to the Freedom of Information Legislation. One order permits public bodies to use and disclose personal information using tools and cloud services outside of Canada in certain circumstances. Another extends the time for freedom of

information responses. Last, organizations are asked to remain vigilant for cyber crime.

Are you ready for CCPA class action litigation?

30 March 2020

Many businesses may not have fully contemplated the major data breach class action litigation risk created by the California Consumer Privacy Act.

Auditing Colombia's agriculture IP

10 Dec 2012

A DLA Piper team audits Colombia's agriculture-related IP and sought to identify Colombian agricultural innovations which are not protected by patents and may have export value.

Colombia: gateway to South America's Patent Prosecution Highway

10 Dec 2012

Understanding the need for more robust patent laws, the Colombian government is aggressively reshaping its IP system.

Divided court revives divided infringement

10 Dec 2012

A recent Federal Circuit decision restores a type of patent infringement claim that it had extinguished five years earlier. The issue is: can a defendant be liable for infringement of a method claim when no single actor commits all the acts that constitute direct infringement?

Trademark or certification mark? The standards body's dilemma

10 Dec 2012

When standards bodies look to protect the marks associated with their standards, they are faced with a dilemma: should they use trademarks or certification marks? One may think the answer is obvious: "certification" seems to be what standards bodies do, and therefore a standards body should always use certification marks. But the obvious answer is not always the right one. Some standards bodies find that trademarks better fit their needs.

China's patent litigation landscape shifts

5 Sep 2012

China bested the United States to become the No. 1 patent filing country in the world in 2011 by obtaining 526,412 invention patent applications, compared to 503,582 utility patent applications in the US. Of these, 79 percent went to domestic Chinese entities, as compared to 49.2 percent to domestic entities in the US.

Ongoing royalties: a new development in patent damage awards

5 Sep 2012

Following the Supreme Court decision in *eBay, Inc. v. MercExchange, LLC*,¹ injunctions do not automatically follow from a finding that a patent is infringed and not invalid. In cases where an injunction is denied, in lieu of the injunction the district court has the power to award what are called "ongoing royalties," a relatively new development in patent damages.

Privacy and your business

5 Sep 2012

Privacy has become an issue that 21st century business leaders and GCs cannot ignore or leave to the engineers. In the information age, personal data is a key asset for many businesses and a centerpiece of business opportunities.

20 Dec 2011

Embryonic stem cell derivations are not patentable in the EU

20 Dec 2011

The Court of Justice of the European Union (CJEU)¹ ruled in *Brüstle v Greenpeace*,² that processes involving derivation of stem cells from a human embryo at the blastocyst stage, entailing the destruction of that embryo, cannot be patented.

Brüstle concerns a patent for isolated and purified neural precursor cells derived from human blastocysts. Central to the case was the interpretation of Article 6(2)(c) of Directive 98/44/EC (the Biotech Directive),³ which excludes patentability of inventions involving “the use of human embryos for industrial or commercial purposes.”

The CJEU decision followed Advocate General Yves Bot’s March 2011 opinion that neither totipotent nor pluripotent stem cells from an embryo that has been modified or destroyed are patentable. In reaching its decision, the CJEU held that the definition of an “embryo” should be read broadly, to include any fertilized ovum whether created by transfer of a nucleus from another mature cell or stimulated to cell division by parthenogenesis. Further, the CJEU decided that processes involving a human embryo are only patentable if therapeutic or diagnostic purposes are applied to and are useful to the human embryo.

The CJEU decision

The CJEU determined that the intent and purpose of the Biotech Directive was to remove any possibility of patentability where human dignity could thereby be harmed. Thus, the concept of “human embryo” must be understood broadly. Accordingly, the CJEU ruled:

- Any human ovum after fertilization, any non-fertilized human ovum into which the cell nucleus from a mature human cell had been transplanted and any non-fertilized human ovum whose division and further development have been stimulated by parthenogenesis constitute a “human embryo.”
- The referring court should ascertain whether a stem cell obtained from a human embryo at the blastocyst stage constitutes a “human embryo” within the Directive’s meaning. However, it was clear from the CJEU’s ruling that such a cell line would not be patentable.
- The use of a human embryo for therapeutic or diagnostic purposes which were applied to the human embryo and were useful to it are *prima facie* patentable.
- If an invention does not itself “use” human embryos, but relates to a product necessitating prior destruction of a human embryo or a process requiring a base material obtained from such destruction, then that invention would not be patentable.

Some research has shown that human embryonic stem cells offer advantages in cellular therapies over other cell lines. By holding that inventions relating to processes for deriving cells from human embryos, or cell lines derived from those processes, are not patentable, the CJEU has reduced the scope within the EU of proprietary protection for inventions relating to embryonic stem cells. Its decision that the definition of embryo should encompass cells derived from parthenogenesis as well as any fertilized ova may also affect those with rights in cell lines and processes covering cell lines derived from fetal tissue.

The decision does not mean such processes or cell lines are not valuable or protectable. Research and innovation will go on and will likely be protected as trade secrets. This could mean that discoveries may be held closely, rather than shared in the scientific community.

There is concern in the industry that in the absence of patent protection, European companies and universities may find it harder to obtain funding for research, and investment may shift to markets that afford patent protection. Because Europe retains a significant knowledge base, it is likely research funding will go on; indeed, because of the *Brüstle* decision, activities enabling stem cell technologies, adult stem cells and iPS cell technologies may grow. In the race toward cellular therapies, companies with

pioneering processes using human embryonic stem cell lines will have to decide whether to apply for patent protection in such countries, with no prohibition on others reproducing their work in Europe, or decide not to file for patent protection anywhere, keeping their knowledge confidential and thereby keeping a competitive edge.

The CJEU decision has firmly placed protection of commercial rights in embryonic cell lines, the processes to derive such stem cells and the application of those lines in cellular therapy into the realm of contractual rights. It remains to be seen whether the *Brüstle* decision will affect stem cell research toward therapeutic applications in the EU.

For more information about the CJEU's decision, please contact:
