HEAD OF THE INTELLECTUAL PROPERTY AND TECHNOLOGY GROUP,
AUSTRALIA

Melbourne

T: +61 3 9274 5857

M +61 412 083 529

Tim Lyons has experience in all areas of information and communications technology, including supply and outsourcing. He has specific experience in procurement, focusing on large scale outsourcing transactions and complex upgrade and implementation projects.

SOUVISEJÍCÍ OBLASTI

- Technologie

Tim has developed and negotiated numerous software development agreements for a number of the firm's clients. He has also provided standard software development, licensing and consultancy services agreements, maintenance and support agreements for a number of companies who provide software development services to larger organisations and for large suppliers.

He frequently advises the Victorian Government and other purchasers of IT systems and products regarding issues specific to the information technology industry.

ZKUŠENOSTI

- Advising the Department of Business and Innovation in relation to the outsourcing of the management of the Australian Synchrotron to Australian Nuclear Science and Technology Organisation
- Advising Department of Transport (Vic) (now PTV) in relation to the support and maintenance of Melbourne's Rail Operations Management System
- Advising one of Australia's largest transport companies in relation to the acquisition and implementation of cash counting and security hardware and systems to support its Cash in Transit business
- Advising a multinational telecommunications company in respect of its renegotiation of its contractual arrangements with the Emergency Services Telecommunications Authority for the Melbourne Metropolitan radio network, supporting communications for Victoria Police, Metropolitan Ambulance Service and Metropolitan Fire Brigade
- Advising Victoria Police and Department of Education and Early Childhood Development in respect of upgrades to and outsourcing of their HRMS Systems
- Advising electricity distribution companies on and drafting of contractual documentation for the Advanced Metering Infrastructure Project. Assisted in relation to the technology acquisition, service level frameworks, and intellectual property

aspects of the technology and network design of the system
