

Renewables

We are at the forefront of the renewable energy market, advising sponsors, developers, financiers and regulatory bodies, amongst others, on transactions across the spectrum of renewable energy technologies, including hydro, solar, onshore and offshore wind, energy-from-waste, biomass and biofuels.

Our renewable energy lawyers have hands-on, practical experience of delivering each stage of a project, including planning, permitting, joint ventures and other corporate matters, structuring equity investment, developing project documents (such as PPAs, turbine supply agreements, EPC and O&M arrangements), project finance (including multi-source, ECA-backed financings) and M&A. We further advise our clients in relation to renewable energy support mechanisms, such as ROCs, LECs and CfDs in the UK, as well as statutory feed-in tariffs and other such mechanisms for both suppliers and end users.
