

Social Infrastructure

Our award winning team is an acknowledged market leader in the global social infrastructure market and has been active in the sector since its inception. Delivering successful social infrastructure PPP projects is about being global. Achieving improvements in public services and tapping global funding markets often involves working with talent outside the country in question, bringing in new models and techniques that have been developed and deployed elsewhere. At DLA Piper, we lead the way in opening up geographic and sector markets for clients thanks to our global reach and ability to export know-how across borders.

We advise both the private and public sector on high-profile social infrastructure projects including sponsors, contractors, funders, central and local government. As well as advising on the procurement and negotiation of projects, our work frequently sees us providing advice and support to our clients post-close during the construction and operational phases.

CAPABILITES

With dedicated teams of lawyers from different countries sharing their local knowledge, we are organized to deliver thought leadership across the full range of social infrastructure sectors including:

- Education;
- Healthcare;
- Emergency services and Judicial;
- Social housing and Regeneration;
- Student accommodation;
- Civic accommodation;
- Leisure.
