The transaction was structured to permit the senior notes to be recognised as eligible collateral for credit operations within the European Central Bank and for the purposes of the Bank of England's Discount Window Facility. The transaction was documented using the Bank of England recommended format for UK Auto Loan Transactions. FINANCE AND MARKETS GLOBAL INSIGHT SERIES

This issue of Finance and Markets Global Insight reflects the ongoing evolution of global financial markets as financiers and businesses continue to grapple with the two key themes of innovation and regulation. There's discussion on the implantation of the revised regulatory framework for derivatives and securitization, as structurers deal with variation margin implantation, and debate around Article 17 of the Securitization Regulation concerning the exclusion of self-certified mortgages. We see how the Nordics are implanting PSD 2 and look at European Central Bank guidance to banks on dealing with non-performing loans. We also weigh up the booming initial coin offerings market, and consider the European Commission's consultation on the impact of FinTech and its role in driving a more competitive and innovative European financial sector. This issue also reports on a new set of framework principles for social bonds to encourage interest in environmental, social and ethically sound investments, the European Union's plan for retail financial services and the FX Global Code. It also brings a US perspective on the risks inherent in trade and commodity finance.

FINANCE AND MARKETS GLOBAL INSIGHT SERIES

On 23 June 2016, the UK electorate voted to leave the European Union in a so-called Brexit referendum. The exit result was a surprise for many working in the finance sector. The change will impact the position of the UK under critical legislation such as the Capital Requirements Regulation, European Market Infrastructure Regulation, Market Abuse Regulation and many other Regulations and Treaties applicable in the UK. We will also see a change as to the role of the UK in significant market initiatives such as the Capital Markets Union. It is likely that these changes will present both threats and opportunities. Until policy is clearer, we will comment on some of the existing challenges caused by EMIR and similar EU Regulations.
