

Technology

DLA Piper works with many of the world's leading technology companies, offering advice throughout a broad range of areas - from corporate transactions to IP protection, patent law and litigation, and including regulatory, compliance, employment and contracting issues.

DLA Piper's global technology sector lawyers work across practice areas and offices to support technology clients wherever they do business. From startups to fast growing and mid-market businesses to mature global enterprises, our clients are companies that develop or create technology, are enabled by technology, or whose business model is fundamentally based on technology. Our technology sector clients include companies in the following areas:

- Software
- Computer hardware
- [FinTech](#)
- PayTech
- InsureTech
- [PropTech](#)
- [Artificial intelligence and robotics](#)
- [Blockchain](#)
- [Unmanned Aerial Systems and Unmanned Aerial Vehicles](#)
- [Telecommunications](#)
- Games and entertainment
- Online commerce and new media
- IT and outsourcing services
- CleanTech
- Semiconductors

We advise technology companies throughout the business life cycle. We help startups get organized and funded and assist both growing and established technology companies in employment matters, commercial and technology transactions and IP patent protection strategies.

Continued growth means a steady need for legal support in such areas as M&A, IPOs and dispute resolution. As companies expand their business internationally, we help with international tax planning, regulatory compliance, establishment of new entities and compliance with local laws for employment, benefit plans and company policies. For the largest companies, we partner with in-house legal departments, providing additional experience and capacity to address all these areas.

These are discussed below, as well as some tips for how the IPP is best used.

Unexpected Human in the Bagging Area: the impact of automation on retail workforces

27 OCT 2017

I suspect most of us have had the experience from time to time - you're looking to buy something a little bit out of the ordinary, and don't really know where to start. Two stories I heard recently neatly illustrate how that can result in both good and bad experiences. One story involves a teetotal friend looking to buy wine for a dinner party. His trip to a specialist vintner was frustrated by a condescending member of staff and resulted in my friend leaving the shop having not made a purchase. In contrast, another friend decided to take up running after being on maternity leave. She visited a running shop, was put at ease but a member of the sales team and left with trainers, clothes and gadgets.

A blockchain overview

19 SEP 2017

In its simplest form, blockchain is a decentralized, distributed ledger on which transactions are anonymously recorded. The transaction ledger is maintained simultaneously across a network of unrelated computers or servers called “nodes”, like a spreadsheet that is duplicated thousands of times across a network of computers. The ledger contains a continuous and complete record (the “chain”) of all transactions performed which are grouped into blocks: a block is only added to the chain if the nodes, which are members in the blockchain network with high levels of computing power, reach consensus on the next ‘valid’ block to be added to the chain.

Initial Coin Offerings – something new under the regulatory sun?

7 AUG 2017

An Initial Coin Offering (**ICO**) is a process by which an organisation raises funds, using block chain technology, through the offer and sale of cryptographically secured digital tokens. Purchasers may use fiat currency (such as NZ or US dollars) or virtual currencies (such as BitCoin or Ether) to buy these digital tokens. Once they are issued, the tokens can usually be traded in secondary markets using virtual currency exchanges.

The consequences of the blockchain evolution would significantly open the field for technology platforms and reduce operational costs.

Global Financial Markets Insight - Issue 10, 2016

28 JUL 2016

FINANCE AND MARKETS GLOBAL INSIGHT SERIES

On 23 June 2016, the UK electorate voted to leave the European Union in a so-called Brexit referendum. The exit result was a surprise for many working in the finance sector. The change will impact the position of the UK under critical legislation such as

the Capital Requirements Regulation, European Market Infrastructure Regulation, Market Abuse Regulation and many other Regulations and Treaties applicable in the UK. We will also see a change as to the role of the UK in significant market initiatives such as the Capital Markets Union. It is likely that these changes will present both threats and opportunities. Until policy is clearer, we will comment on some of the existing challenges caused by EMIR and similar EU Regulations.
