The shifting sands of the economy are showing signs of settling. With confidence improving and opportunities emerging, often technology is the key driving force for change.

TechLaw 2015 is the opportunity to look at the legal framework which surrounds these fast paced developments. Join us for our sixth annual legal update discussion on current opportunities, challenges and risks for the technology sector.

Hear from our experienced lawyers and industry panels and have your chance to ask questions and share experiences with others in the sector.

Topics will include:

- Internet of Things
- Cyber Security

- Licensing and Enforcement of Patents
- Digital Start-ups and Funding

With speakers confirmed so far from Aviva, Nokia, Cisco and Hubble.

This seminar is FREE and aimed at managers and legal counsel in the technology sector.
