

mRNA Technology: A New Approach to Therapeutics

AT THE INTERSECTION OF SCIENCE AND LAW

8 September 2021

For decades, scientists have studied the seemingly endless possibilities of custom-made messenger RNA, or mRNA. Kathy Fernando, Head Vice President, Worldwide of Clinical Operations at Pfizer, spent her early bench science career working with mRNA technology and had a front row seat to the creation of the COVID-19 vaccine. In this episode, DLA Piper's Dr. Lisa Haile talks with Dr. Fernando about the study of mRNA and how COVID-19 catalyzed its advancement.

DLA Piper · mRNA technology and the COVID-19 vaccine: A conversation with Pfizer's Kathy Fernando
