Martin specialises in structured credit and asset management acting for many of the world's leading private equity credit funds, banks and corporations, on complex funding structures, portfolio sales, securitization, derivative products and technology investment. He has over 25 years' experience working for and advising funds and financial institutions.

Leading a team of over 700 lawyers in more than 90 offices worldwide. The group provides advice on tax efficient structuring, vehicle formation and management, regulatory issues, vehicle funding and lending, asset acquisition and disposal including NPLs and consumer assets, capital markets listings and reporting, and asset management including portfolio repackaging and trading.

Martin is recognised as one of the world's leading FinTech lawyers (ranked in Legal 500) and advises on technology solutions for emerging and traditional funding structures. He is at the forefront of alternative investment strategies and products including applying new techniques through platform structures, digitalization and fund driven investment.

Transactions in 2018/2019 include:

Structured Credit Funding and Securitization

- Waterfall Capital Investors as investor and funder through its European funds platform to a number of specialist funding businesses

КВАЛИФИКАЦИЯ

Профессиональная квалификация

- Солиситор Высших судов Англии и Уэльса

Карьера

Previous experience includes being head of structured products at Calyon (formerly part of Credit Lyonnais and now Credit Agricole in London), where Martin was responsible for originating and structuring project bonds, high yield bonds and securitisation products and as a member of the debt structuring team of Greenwich Natwest (now RBS) where he was responsible for structuring solutions and modelling regulatory capital impacts for bond and debt products.

Martin previously headed finance teams at three international law firms and acted for one as their London Office Managing Partner. Martin originally trained at and spent seven years with a 'magic circle' firm in London and Hong Kong.

Образование

- University of London, Kings College, LLM (Hons), 1986
- College of Law of England and Wales, Lancaster Gate, Law Society Finals, 1987

Thought leadership

Martin brings to legal structuring a rare combination of experience as a structured finance investment banker, financial modeller and leading financing lawyer.

Martin has been at the forefront of developing legal structures for many years and has worked on several first of type transactions. Notable firsts include:

- first international securitisation out of Poland and first securitisation to receive PCS label in Poland (Santander Consumer Bank S.A.)
- first project bond to receive benefit of UK government credit wrap under IUK scheme (Mersey Gateway Project)
- first project bond post financial crisis (Leeds County Council);
- first PCS label auto securitisation in the UK (FGA - A-best 8);
- first project finance securitisation in Yemen (Pemberley Finance);
- first credit derivatives product company in Europe (Deutsche Bank);
- first credit card principal financing in the UK (Compucredit);
- first mortgage securitisation in Kazakhstan (BTA Group);
- first ever PFI project bond to be completed in the UK (RBC).

Speech by the FCA Chair on the Risks of Online Cryptoasset Promotions

8 September 2021

On 6 September 2021 the Chair of the Financial Conduct Authority (FCA) and Payment Systems Regulator, Charles Randell, gave a speech to the Cambridge International Symposium on Economic Crime about the risks of token regulation.

FCA Research finds increased Cryptoasset Ownership but Declining Consumer Understanding

22 June 2021

On 17 June 2021, the Financial Conduct Authority (FCA) published a Research Note on cryptoasset ownership. According to the Research Note, the FCA estimates that 2.3 million adults now hold cryptoassets (up from 1.9 million last year).

Update to tax treatment of cryptoassets to incorporate staking

6 April 2021

On 30 March 2021, Her Majesty's Revenue & Customs (HMRC) updated its Cryptoassets Manual to take into account staking in proof-of-stake networks.

HMRC confirmed that such passively earned cryptoassets will likely be subject to Capital Gains Tax or Corporation Tax on chargeable gains when the cryptoassets are subsequently sold. This position is largely the same as the established tax treatment of cryptoasset mining activities.

Brexit - impacts and changes for securitisations in the UK and Europe

29 January 2021

Securitisation remains one of the most effective and efficient forms of financing to support business growth and development. In spite of years of regulatory interference, delay and badly developed regulation the market continues to operate, admittedly at significantly reduced levels. The UK now has the opportunity to re-establish a securitisation regulatory regime that is effective and more appropriate to the risk and structures involved. This is however likely to be some way off as participants initially continue to operate within the current regulatory framework.

Collaboration models form the basis for future success

20 January 2021

The rollercoaster experience of disruption to long-term relationship has been a breathtaking and sometimes stomach-churning ride for fintech and banking alike. Commercial "collaboration" is often hard to achieve, so here we aim to pin down more closely, from a legal perspective, what is meant, what is covered and where the pitfalls might lie.

HM Treasury consultation on regulatory approach to cryptoassets and stablecoins

13 January 2021

On 7th January 2021, HM Treasury published a consultation paper outlining the UK's proposed regulatory approach to cryptoassets and stablecoins (the "Consultation").

The Consultation represents the first stage of HM Treasury's consultative process on the broader regulatory approach to these assets. Within the paper, HM Treasury acknowledged the benefits of such products and reiterated its intention to ensure that the UK remains a "world-leader" in financial technology, while seeking to mitigate related risks to consumers and financial stability.

Can blockchain live up to the hype?

28 JUL 2016

Is blockchain the revolutionary technology that will rewrite the rules for the finance industry, identifying authenticity and verifying payment flows that arise at a business-to-business level or between business and consumers and peer-to-peer? The consequences of the blockchain evolution would significantly open the field for technology platforms and reduce operational costs.

Global Financial Markets Insight - Issue 10, 2016

28 JUL 2016

Finance and Markets Global Insight

On 23 June 2016, the UK electorate voted to leave the European Union in a so-called Brexit referendum. The exit result was a surprise for many working in the finance sector. The change will impact the position of the UK under critical legislation such as the Capital Requirements Regulation, European Market Infrastructure Regulation, Market Abuse Regulation and many other Regulations and Treaties applicable in the UK. We will also see a change as to the role of the UK in significant market initiatives such as the Capital Markets Union. It is likely that these changes will present both threats and opportunities. Until policy is clearer, we will comment on some of the existing challenges caused by EMIR and similar EU Regulations.
