Nancy is a registered patent attorney and intellectual property litigator. She advises clients on a wide range of prosecution strategies for life science technologies, including antibody technologies, pharmaceuticals, biologics, CRISPR/Cas technologies, therapeutic and active agent delivery systems, and medical devices, among others.

Nancy also advises clients in invalidity, noninfringement, and freedom-to-operate analyses, and works with the IP litigation team in representing leading companies in patent infringement and trade secret misappropriation matters.
