

## Education

Ours was one of the first major law firms in Canada to establish a practice dedicated to the unique requirements and challenges of educational institutions and their leaders.

We understand the particular constraints facing all educational institutions and have deep experience providing legal services to public and private educational institutions at all levels of the education system and to professional organizations and associations involved in education. Along with our experience in education and human capital, we align skills and experience in regulatory compliance, administrative law, litigation, labour relations, corporate governance, government relations and public affairs, alternative dispute resolution, privacy, intellectual property, corporate/commercial law, real estate and immigration. We specially select the members of our Education Law group from practice areas across our firm to help clients access the full spectrum of the business legal and consulting services they may need to meet their goals and objectives.
