

Energy and Natural Resources

In a world where the demands for energy are growing exponentially, those operating in the energy sector are looking to their lawyers to provide more than legal skill; they are also seeking in-depth sector know-how and innovative solutions to the challenges they face. DLA Piper's energy lawyers deliver to our clients the focused, innovative sector advice they need, wherever in the world they need it.

In a sector of relentless change, demand and complexity, private and public corporations wisely rely on experienced, global legal counsel for any matter involving energy.

We are entering an era of unprecedented demand for power generation and transmission, especially within emerging economies. This dynamic, together with the challenges we all face from climate change, is creating new opportunities for alternative energies and new technologies.

Our energy clients receive coordinated, across-the-board coverage for their needs, including construction and projects, corporate, competition, regulatory, contractual, trading, litigation/arbitration, dispute resolution and tax issues. We understand the technical, geographical, commercial and geopolitical factors that shape the industry and have first-hand access to contacts, sponsors and decision makers worldwide.

DLA Piper's energy team includes professionals in the detailed, multi-layered and often complex regulatory frameworks that apply to energy sector projects and activities. We advise regulators, the regulated, investors and other industry participants on the implications of the regulatory framework during the planning, development and operational stages of many energy projects and activities.

For decades, we have represented organizations operating in the sector throughout the world. Our global team serves clients in the power, oil and gas, renewable, nuclear, energy trading, climate change and water markets. Alongside energy companies, our clients include project sponsors, corporations, developers, financial institutions, governments, utilities and regulatory bodies.

We work with a broad scope of clients ranging from the world's largest oil and gas companies to investment banks active in energy and commodities trading and venture-backed alternative energy entrepreneurs. Our lawyers provide strategic advice on planning, development, financing and permitting matters, as well as legislative, political and regulatory issues.

Commodities

- Industrials

DLA Piper is among the few law firms in the world that maintains a global group dedicated to servicing the commodity markets. No matter where in the world commodities are being traded, sold, shipped, stored and financed, DLA Piper has experienced and industry-focused attorneys ready to provide assistance with regulatory and compliance issues, transactions of all types and dispute resolution. Most of these lawyers have been active in the commodity markets for decades and some have had lengthy in-house careers or have worked with industry associations for years, so they are familiar with all that happens in a commodity business, from the trading floor to the board room.

With an enormous global reach across more than 40 countries on six continents and a lengthy list of practice areas useful to commodity players, DLA Piper has at its disposal everything needed to serve as a prime one-stop shop for traders, marketers, transporters, financiers and producers of commodities. Our client list includes some of the largest and most active commodity players in the world, so our lawyers are constantly working at the leading edge of the innovations and trends that are shaping the business. We are very much aware of the competing interests that sometimes arise around a commodity trade or transaction and can assist in striking the proper balance among those interests from both a legal and a commercial perspective.

Our core team of commodity-focused lawyers regularly counsels on matters central to the commodity business: regulatory and compliance obligations, materials and training; OTC and on-exchange trading, hedging and risk issues; structured deal-making and trade finance, including cross-border transactions; vessel-owning and chartering matters; physical infrastructure development and utilization; and litigation and arbitration throughout the world. Augmenting these core competencies is a vast array of supporting areas of experience that enhance our service offering to the industry: sanctions and OFAC regulations; anti-bribery and corruption laws; cybersecurity; IT and data management; government contracting; real estate; rail and aviation; and renewable energy; among many others.

We are also at the forefront of providing complimentary value-added support to the industry, including a quarterly roundtable discussion dinner in both the New York and Houston areas; frequent alerts on breaking legal developments important to your daily business decisions; and regular webinars, podcasts and in-person events which address topical issues impacting the industry. Interested parties are very much encouraged to advise if they would like to be added to the circulation list for these offerings.

Mining

Changing economic conditions are often felt at the mine mouth long before they appear on the balance sheet or the boardroom table. DLA Piper is responsive to our clients' needs as they adapt to the cyclical shifts in the global commodities markets. Our innovative solutions assist them to efficiently address these challenges and opportunities.

From startup to divestment or site closure, our mining legal team can provide a complete legal solution, covering everything from day-to-day operational issues to large scale international transactions and arbitrations.

Our commodities lawyers have detailed knowledge of local regulatory environments, key project drivers and the market. We understand how the many components of a project interact with one another. Our mining team takes a holistic approach to project development, which enables us to offer a balanced assessment in the best interests of the project as a whole. We can assist you to identify, analyze, negotiate and document project structures and to maintain efficiency when the project is operational.

DLA Piper is developing innovative solutions to some of the most complex and important issues facing the mining community today. These projects, while not only important in financial terms, are also breaking new legal ground in their treatment of difficult issues such as third party access to infrastructure and state agreements and concessions.

Mining is a truly global industry and we can provide the location-based assistance as well as the experience and skills that clients in this sector require.

We offer mining and minerals support in all of the major mining regions of the world, including emerging markets in Africa, Latin

America, Asia and the Middle East, as well as the more established markets in Australia, North America and Europe.

Our international reach means we have the local strength and knowledge to advise our clients on specific legal, cultural and political issues wherever they arise.

For those with projects across countries or continents, we can provide a single point of contact to help manage the delivery of legal services to all of your projects and your personnel.

Our multidisciplinary industry focus offers our clients responsive, cost-effective help. Whatever the nature of your legal requirement or business need, you can rely on our detailed knowledge, experience and understanding.

A SELECTION OF CLIENTS:

Miners

- Anglo American
- BC Iron
- China Coal
- Coeur Mining
- Ferrous Resources
- Fortescue Metals Group
- Newmont Mining Corporation
- Norilsk Nickel
- Rio Tinto
- Xstrata

Financiers / Investors

- Credit Suisse
- Macquarie

Operators / Buyers

- Baosteel
- Sinosteel
- Lafarge
- Mitsubishi
- Sibelco/Unimin
- Arcelor Mittal
- Tata Steel
- POSCO
- Marabani
- Sinopec

Suppliers

- POSCO E&C
- STX
- Bristow Helicopters

Government

- Government of Guinea
- State of Western Australia
- Government of Uganda
- Government of Kazakhstan

CASE STUDIES

- When the Indian Government's Department of Disinvestment and Coal India Limited (the world's largest coal miner) planned an initial public offering of shares, we were chosen following a formal government counsel selection process involving more than six international law firms. The deal raised US\$3.43 billion, making it the largest IPO in the history of Indian capital markets and the third largest IPO in the world during 2010.

- We are assisting the Australian Premium Iron Joint Venture in all aspects of the development of the West Pilbara Iron Ore Project, which involves the development of three new iron ore mines, 350km of heavy-haul railway and a new deep water port at Anketell Point.
- Our broad experience in the financing of mining operations came into play when we represented a major bank in the financing of the development, construction and operation of an iron ore concentrator facility in the USA. It was structured as a fully secured project financing and commodity hedges were an important part of the deal structure, the borrower being required to hedge against iron ore concentrate price fluctuations over a multiyear period to ensure that offtake revenues would be sufficient to cover debt service.
- A cross-border team from Paris, Perth, New York and Brussels are assisting the Government of Guinea in the review of mining rights and conventions granted by the prior governments and on the renegotiation of concessions and conventions in accordance with the new Mining Code.
- We advised Lloyds Banking Group on the debt and equity restructuring of UK Coal plc (now renamed Coalfield Resources plc). An unsuccessful rescue bid would have resulted in company administration, closure of mines, the loss of 2,500 jobs and a tax payer bailout. Working closely with the Lloyds team, we helped achieve the desired outcome; the separation of the businesses of the Group into new divisions and the isolation of existing pension liabilities of GBP400 million.
- Following a mining failure in Indonesia, the reinsurers hired us to handle a USD500 million claim. The case was eventually settled on very beneficial terms for the reinsurers.
- Representing the Republic of Guinea in consolidated, multi-billion dollar ICSID arbitrations brought by BSG Resources ("BSGR"), claiming expropriation of a mining concession and related rights in Guinea, in what is one of the most important and high-value mining disputes in the world.
- Acting for the Republic of Kenya in respect of an ICSID claim brought by the mining investor, Cortec. This claim is thought to be the highest value and most strategically important investment treaty claim Kenya has ever faced.

Oil and gas

DLA Piper's Oil and Gas lawyers have extensive experience in all segments of the global industry. With a vast network featuring practitioners on the ground in key jurisdictions worldwide, we understand the industry-specific nuances that affect energy transactions and disputes as well as complex, multi-jurisdictional engagements that are part of your strategy wherever you do business.

We handle both onshore and offshore legal work for a spectrum of clients, from major international oil companies, governments and state-owned companies to independents and private equity and mid-market entities. We offer leading lawyers in mergers and acquisitions, project development, finance, tax, environmental, technology and IP, real estate and dispute resolution. All our lawyers work together as a team across our global platform to address your transactional needs and, when necessary, to mobilize immediately.

We work with contractors, developers, utilities, banks, investors and governments, providing strategic advice on planning, development, financing and permitting matters, as well as legislative, political and regulatory issues.

Our experience encompasses:

- **Upstream:** licensing/concessions, exploration and extraction; the operation of oil and gas fields; farm-ins/farm-outs, JOAs, joint venturing
- **Midstream infrastructure:** construction, financing and operation of oil and gas infrastructure, such as pipelines, tank farms and refineries; sales and handling of crude oil and gas, along with the construction of related infrastructure; and CNG/LNG projects/sales
- **Downstream dissemination of products:** offtake of production and the sale of products; lifting and transportation of oil and gas; storage and through-putting of products
- **Acquisition and disposal** of oil and gas interests/assets; due diligence and investigation behind acquisitions
- **Financing for oil and gas:** funding acquisitions; project-financing for developments; funding cash-calls; security structures over oil and gas assets; trading of oil products
- **Shipping and trading** of oil and gas

- International arbitrations and other forms of dispute resolution

Power

The firm's Power team comprises lawyers throughout the Americas, Africa, Asia Pacific, Europe and the Middle East, positioning us to help energy clients with their legal needs anywhere in the world. Our key service areas within the Power sector include:

- Conventional generation
- Renewables
- Alternative energy
- Transmission and distribution
- Wholesale and retail electricity
- Energy market reform

We advise on all phases of power transactions including:

- Project development
- Mergers and acquisitions
- Financing
- Corporate structuring and tax advice
- Licensing and technology transfer
- Government / regulatory
- Litigation and international arbitration
- Environmental
- Employment

We have completed financings that have been implemented through a variety of structures, including traditional offtaker-based project financings, PAPS tax equity investments, leasing, private placements, portfolio financings, multi-tranche first and second lien structures, export credit agency and other multilateral agency supported transactions. By representing clients with diverse roles in many types of transactions, our group has developed experience that well equips us to assist clients in assessing and resolving the complex issues that arise in project finance matters.

Renewables

DLA Piper's globally situated Renewables practitioners represent sponsors, lenders, equity investors, multilateral institutions and government bodies and agencies in the development, financing, construction acquisition and sale of, or investment in, a wide range of renewables-related projects and infrastructure projects. Among these are renewable power generation projects, energy storage facilities, utility-scale, distributed and residential solar, on-shore and offshore wind and biomass and other innovative and technology-based entities. We deliver comprehensive services to renewables clients from project finance and development and M&A to tax, environmental, real estate, tech and IP, employment and disputes and arbitrations.

We have advised on hundreds of renewable energy projects developed and financed around the world. Members of our team regularly represent clients in the purchase of wind turbines, solar panels, batteries, inverters, gas turbines and steam generators and other equipment or related and in the evaluation of such contracts in the context of an acquisition or a financing.

We have been active in energy storage for almost a decade and have monitored the industry's progress closely while advising clients on the negotiation of long-term offtake agreements, evolving tariff requirements, the purchase of equipment and project financing, including the landmark financing of a portfolio of battery storage systems.

Water

We are involved in some of the largest, most complex water projects in the world. In addition to project development and finance, we help with water-related mergers and acquisitions, project bids, procurement, sovereign immunity, contracting authority, environmental and other regulatory matters, commercial agreements, intellectual property and dispute resolution.

- The lenders, Standard Bank and Nedbank, in connection with the MIGA-backed project financing of a reverse osmosis desalination plant in Ghana.
- Northern Ireland Water, supporting the procurement of a number of framework contracts from which NI Water will be able to call off the services and works necessary to enable it to maintain its vital drinking water and sewerage infrastructure. This involved providing procurement advice on the suite of documents as well as advice on structuring the procurements.

Waste

Our waste sector experience spans the spectrum of waste-related agreements - we advise clients on construction and operating agreements, transportation, landfill, fuel supply, recycle sale and other residue offtake agreements, as well as advising on environmental and planning issues, technological development and regulatory disputes. Projects on which we have advised include fully merchant facilities and others underpinned by long-term local authority contracts.

Working on these projects requires a detailed understanding of not only the relevant regulatory legislation, but also of the technologies used and the risks associated with them. Our experience in these matters allows us to measure, anticipate and manage our clients' risks whatever the scale of the project.

- Carbon Trading: Advising the European Commission under two multi-annual frameworks on implementation and amendments to the Auctioning Regulation and other related EU ETS Regulations, as well as the negotiations with EEX/EEC as EU ETS Common Auction Platform operator and clearing entity.
- Corporate Power Purchase Agreement: advising DekaBank Deutsche Girozentrale as lenders on a complex dual-PPA structure for a 254 MW wind park located in Sweden, involving two power purchase agreements – one with Google and the other Holmen.
- Corporate Power Purchase Agreement: Advising Unilever on their PPA documentation and precedent international solar PPA for use across multiple jurisdictions including seven private wire PPAs across the US, Middle East and Africa.
- Electricity and water: As a result of the work we have done for the Government of Iraq, we are the leading international legal practice operating inside Iraq. This includes representation of the Iraqi Ministry of Electricity in its negotiations to acquire more than US\$5 billion in electricity generation equipment, to procure engineering services and construction contracts and to secure water and fuel supplies. We have also helped the Ministry of Water Resources with large-scale infrastructure projects.
- Oil and gas: We represented BP as principal counsel for the US\$2.4 billion sale of its southern California refining and marketing business, formerly known as ARCO, to San Antonio-based Tesoro Refining and Marketing Company. The contract was signed in August 2012, and the deal closed on June 1, 2013, after receiving clearance from both federal and California regulators.
- Renewable energy: Independent Power Producers Procurement Programme Matters, South Africa. On completion, this will be the largest renewable energy project in the world. Our lawyers in Australia, Hong Kong and London advised more than half of the successful bidders for Phase 1 and 2 of this solar, wind, hydro, biomass and biogas project. We are also acting for bidders and lenders providing project finance for a number of projects in Phase 3. The goal of this landmark project is to generate 42% of all new electricity in South Africa from renewable energy sources over the next 20 years.
- Power: For China Hydroelectric Corporation's successful US\$96 million NASDAQ IPO, we advised on the pre-IPO financing and the acquisition of hydropower plants in China. We also provided structuring advice for its operations, implemented a corporate reorganisation and advised on CDM eligibility.
- Nuclear: We act for virtually all of the site licensee companies (SLCs) in the UK, as well as for the Nuclear Decommissioning Authority and other parent body organizations to the SLCs. We are principal advisers to Sellafield Limited, Magnox Limited,

International Nuclear Services Limited and are instructed by Westinghouse, DSRL, LLWR and NNL.

- Energy disputes: We achieved a victory for Central New York Oil and Gas Company in a case that cleared the way for development of the US\$257 million Marcellus Shale gas pipeline project. The case was one of first impression on the degree to which federal agencies and private pipeline and energy companies must account for the impacts of Marcellus Shale well drilling when reviewing the environmental effects of pipeline projects.
- Water and wastewater: Represented United Water, a subsidiary of Suez Environnement, in its joint venture with KKR & Co. to acquire a 40-year water and wastewater concession from Bayonne, New Jersey. The concession requires more than US\$300 million of capital improvements, one of the first water and wastewater concession deals completed in the US.

Suspend imports of fresh beef from Brazil, US cattle group says; plant-based producers take new approach in suit over Oklahoma labeling law; plus salt, soda, and news from Hawaii

Six commodities predictions for 2022

2 December 2021

The worldwide turmoil of 2020 is, in many ways, still with us, but the good news is that alongside the struggles, the commodities realm is seeing an immense number of opportunities. Here, we take a fast look at the six areas we think the commodities sector should be watching in the year to come.

The Glasgow Climate Pact: What does it mean for Business?

23 November 2021

In this article, members of our Sustainability and ESG Steering Committee share their thoughts on eight key themes emerging from COP26 and what they mean for business.

New developments in the Mexican energy sector generate uncertainty

17 November 2021

A discussion of relevant measures, criticisms and comments.

Food and Beverage News and Trends

12 November 2021

FOOD AND BEVERAGE NEWS AND TRENDS

Avoid foods with glittery garnishes, CDC says; USDA considers whether Salmonella should be declared an adulterant; soaring energy costs this year may mean widespread food shortages next year.

The role of offshore wind in O&G's energy transition

11 November 2021

The oil and gas sector wants to change. Faced with an inevitable decline in long-term prospects resulting from climate change and the need for an energy transition, oil and gas companies increasingly realise that their future lies outside fossil fuels.

Global Reporting Initiative updates its Universal Standards – revisions will affect ESG reporting by numerous businesses

3 November 2021

GRI 11 outlines topics likely to be material for oil and gas organizations and lists relevant disclosures, such as air emissions, climate adaptation, and water and effluents.

Treasury releases 2021 Sanctions Review: Its key recommendations and their implications for the private sector

28 October 2021

[GLOBAL SANCTIONS ALERT](#)

The Report puts into perspective recent Biden Administration sanctions while helping to forecast what will come.

FERC reliability standards in wake of Winter Storm Uri

27 October 2021

One recommendation included a mandatory electric reliability standard.

A summary: the CFTC position limits compliance deadline of January 2022

21 October 2021

Changes to the definition of a “bona fide hedging transaction or position.”

Five issues to watch for at COP26 in Glasgow

12 October 2021

Hopes had already been high for COP26 even before the pandemic paused it. The pent-up potential has only heightened those expectations.

An interview with Aldersgate Funding

11 October 2021

In this podcast, DLA Piper partner Henry Quinlan interviews Jim Holding and Matthew Lo at Aldersgate Funding Limited, who shed some light on the advantages of litigation and arbitration funding; the types of claims eligible for funding; the process of funding a case;

and the jurisdictional constraints on this type of financing.

DLA Piper · Aldersgate Funding on how litigation funding can help your business

OECD announces global deal on international tax reform with its Two-Pillar solution

11 October 2021

In addition, the OECD sets out a detailed implementation timeline aiming to have parts of the plan ratified in 2022 and effective as early as 2023.

New antidumping and countervailing duty petition: Oil country tubular goods from Argentina, Mexico, the Republic of Korea, and Russia – consequences for industry and downstream consumers

8 October 2021

US AD and CVD investigations can result in the imposition of substantial duties in addition to already applicable duties and tariffs.

President of Mexico files constitutional reform bill on electricity

7 October 2021

The result may include serious consequences for private investors in the energy sector in Mexico.

Commodities trading firms face increasing risk of FCPA enforcement activity

5 October 2021

These developments signal a new, active period of heightened anti-corruption scrutiny for commodities trading firms.

Biden Administration works to expand US offshore wind market

28 September 2021

The federal government moves forward assertively with an expanded leasing program aiming to double offshore wind production by 2030. Meanwhile, some states are acting too.

As California aims to achieve carbon neutrality, CARB is updating the Scoping Plan: stakeholders may take part in the September 30 workshop

27 September 2021

An opportunity to engage with California's strategic approach to addressing climate change.

Commodities News and Trends

20 September 2021

[COMMODITIES NEWS AND TRENDS](#)

Brazil and Argentina lead the way in biofuels; CFTC: we will support transition to a low-carbon economy; is the end in sight for the shale-driven pipeline building boom?

Episode 7: How can we ensure emerging markets aren't left behind?

20 September 2021

THE CLIMATE TRANSITION PODCAST

In this episode , Natasha Luther-Jones is joined by Rael McNally from Blackrock and the lead portfolio manager for the Climate Finance Partnership, an innovative clean energy an infrastructure strategy focused on emerging markets, to discuss the opportunities and challenges of investing in emerging markets.

DLA Piper · How can we ensure emerging markets aren't left behind?

By any standard? Meeting sustainability commitments through credible carbon markets

13 September 2021

Operating in today's evolving voluntary carbon trading ecosystem.

Protecting your company from supply chain cyber attacks

September 2021

Today, virtually all companies rely on third-party technical solutions to manage their business. The downside is that incorporating new third-party technology into business operations creates new vectors for cyberattacks.

New workplace sexual harassment laws passed – (some) Respect@Work recommendations become law

8 September 2021

After months of anticipation, the Australian Federal Government's Sex Discrimination and Fair Work (Respect at Work) Amendment Act 2021 has now passed both houses of Parliament. The amendment contains important reforms to address workplace sexual harassment.

Consumer Em-Power-ment: Treasury proposes draft rules for the Consumer Data Right in the Australian energy sector

3 September 2021

The Australian Government Treasury has released for industry consultation, draft amendments to the Consumer Data Right rules and regulations made under the Competition and Consumer Act 2010 (Cth), seeking to expand the Consumer Data Right regime into the energy sector.

Energy storage tax credits and climate goals: Latest developments in Washington

24 August 2021

To meet President Joe Biden's goal of achieving 100-percent carbon pollution-free electricity by 2035, the US is anticipated to need 100 GW of storage by 2030.

Brazil: Bioenergy in the ESG context

22 July 2021

A look at Brazil's evolving approach to the sustainable use of environmental resources.

Episode 6: Will oil giants supercharge the transition?

20 July 2021

THE CLIMATE TRANSITION PODCAST

Oil giants have responded to Covid-19 by setting out 'green recovery' plans that could massively increase their investments in renewables. How will we see these companies change? How will this affect investment in renewables? In this episode, we look at these oil giants' changing investment plans and what this means for the energy transition.

DLA Piper · Will oil giants supercharge the transition?

Ransomware preparedness: NYDFS announces additional expectations of regulated entities' cybersecurity programs

7 July 2021

As regulatees address their vulnerabilities to ransomware, NYDFS raises its expectations.

Episode 5: What should we expect from COP26?

6 July 2021

THE CLIMATE TRANSITION PODCAST

In this episode, we're joined by Ambassador P. Michael McKinley as we look ahead to COP26 and the best that businesses can hope for. Will this mark a step change in the energy transition? Are we putting too much faith in politicians to lead on that transition? How much can businesses lead and, if so, how much will COP26 help them?

DLA Piper · What should we expect from COP26?

Impact on the US solar, silicon and related industries of new US government actions aimed to address labor practices in Xinjiang

6 July 2021

Key details and implications for US companies.

Sustainability standards setter seeks input on draft GRI Standards for agriculture, aquaculture, fishing and coal

1 July 2021
Key details.

Global M&A Intelligence Report 2021

23 June 2021
Our annual Global M&A Intelligence Report is based on an analysis of key deal terms in over 3,200 private M&A transactions on which we advised since 2015.

Global corporate benchmarking group seeks inputs on corporate human rights standards

22 June 2021

Winter Storm Uri: New Texas legislation aims to improve power grid, restructure the grid's overseeing agency

15 June 2021
The legislation responds to calls for sweeping change to the power infrastructure in Texas.

A long hot summer: Five steps for energy commodities traders in a time of heightened scrutiny

14 June 2021
Rising temperatures may exacerbate current market volatility, which in turn may lead to heightened regulatory scrutiny.

Whatever your sector, ransomware attacks are changing how to think about platform security risk: Action steps

14 June 2021
In an increasingly digitized economy, creating awareness of platform security risks is critical.

Episode 4: Does energy need a digital transformation too?

11 June 2021
[THE CLIMATE TRANSITION PODCAST](#)

In this episode, we are joined by Brian Case, Chief Digital Offer at GE Renewable Energy to discuss the digital transformation of the energy sector.

DLA Piper · The Climate Transition Podcast – Does energy need a digital transformation too?

Reforms in the energy legal framework in Mexico and challenge mechanisms

4 June 2021

The Energy Counter-Reform includes variations which aim to restore the monopoly power of CFE and Pemex.

Announcing our global guide to Corporate Power Purchase Agreements

3 June 2021

At a time when sustainability and environmental issues are coming to the fore, PPAs remove a significant roadblock to financing and building new renewable facilities and help to deliver more renewable energy on the grid.

Commodities News and Trends

3 June 2021

COMMODITIES NEWS AND TRENDS

Fossil fuel industry and ESG; energy aspects of Biden infrastructure plan; floating storage can rule the seas or give you a sea of trouble.

Multi-jurisdiction guide for screening foreign investments

26 May 2021

The aim of this guide is not to substitute proper due diligence and specialized advice when conducting business, it will hopefully help the reader navigate the different FDI regimes. Particularly in this complex context and in view of the proliferation of new regimes, by explaining the key aspects of regimes including main issues to consider, thresholds and proceedings to take into consideration when investing in our globalized world.

Episode 3: Are corporates in the green driving seat?

24 May 2021

THE CLIMATE TRANSITION PODCAST

We have seen growing demand from corporates to buy power from wind and solar projects. In this episode, we are joined by Phil Dominy from EY as we look at how current agreement in these power purchase agreements (PPAs) is driving significant corporate activity on fixing the climate crisis. Are PPAs delivering the action we need? How can corporates work closely with renewable operators to do more and do it faster? How can we grow PPAs beyond a handful of off-takers and countries?

DLA Piper · Corporate power purchase agreements: Are corporates in the green driving seat?

Texas considers truth in labeling law for meat-alternative products: Potential consequences in the marketplace and the courtroom

19 May 2021

Truth in labeling acts have been met with close scrutiny in the states that have passed them.

President Biden issues broad-ranging Executive Order on cybersecurity

13 May 2021

The EO sets forth new requirements for federal agencies and government service providers.

The Russia sanctions and their impacts on commodities companies: Action steps for companies engaged in transactions with Russian gas and energy companies

11 May 2021

Implications of key provisions in President Biden's Executive Order.

Episode 2: The hydrogen age: fact or science fiction?

5 May 2021

THE CLIMATE TRANSITION PODCAST

In 2020, politicians around the world threw their weight behind green hydrogen as the fuel that will unlock the energy transition. Are they right? Can we pin our hopes on a technology that has been around since the 1970s? How can we overcome all of the hurdles? And, if we are heading for a hydrogen future, can we make it as clean as possible?

DLA Piper · [The hydrogen age: fact or science fiction?](#)

Democrats reintroduce Climate Risk Disclosure Act

27 April 2021

The bill aims to help companies and investors assess their exposure to climate-change risk and to push companies to address their contributions to climate change.

Episode 1: When will offshore wind go truly global?

22 April 2021

THE CLIMATE TRANSITION PODCAST

Offshore wind is growing in Europe and Asia, and will in the US too. In this episode, Olivia Breese from Ørsted joins us to discuss the health of the offshore wind market. Where are the current and future hotspots? Will floating wind help to unlock huge investment activity? And how can companies navigate an environment where power prices are falling yet bidding costs are rising?

DLA Piper · [The Climate Transition Podcast: When will offshore wind go truly global?](#)

FERC issues policy statement regarding state-determined carbon pricing in wholesale electricity markets

22 April 2021

The policy statement allows FERC to avoid the restriction imposed by the *EPSA* decision, which reserves certain matters under FPA section 201(b) exclusively for the states.

Georgia's HB 156, requiring state notice for utility cybersecurity incidents, is now in effect

21 April 2021

The law creates specific notice requirements for state agencies and utilities that experience cybersecurity attacks and requires swift notice to the state director of emergency management in Georgia.

US government announces sweeping sanctions against Russia

16 April 2021

GLOBAL SANCTIONS ALERT

The newly imposed sanctions represent a significant escalation and addition to the sanctions architecture put in place by the Obama and Trump Administrations.

Winter Storm Uri: Using the doctrine of impracticability or impossibility for breach of contract claims

14 April 2021

Because some potentially impacted contracts are governed by New York law, we examine these defenses in light of both New York and Texas law.

Claiming the export exemption to the Section 4081 excise tax on diesel fuel and kerosene

8 April 2021

With proper planning, a taxpayer may be able to take advantage of this exemption.

Mexico's Hydrocarbons Law Reform Bill: A controversial new measure in the Mexican energy sector

8 April 2021

The reform seeks to give Pemex the same monopoly control it had over the national market before the 2013 energy reform.

ERCOT v Panda: The Texas Supreme Court's non-decision on ERCOT immunity

29 March 2021

The outcome of *Panda* paves the way for the issue to return to the Court, likely next year.

CFTC's new Climate Risk Unit: Another tool in the Biden Administration's "whole of government" campaign against climate change

23 March 2021

With this move, the US joins governments across the globe in recognizing the vital role derivatives markets will play in developing new solutions to address climate and sustainability challenges.

\$9,000 per MWh, disputes over governance and invoices, possible bankruptcies: Texas looks at the structure of its wholesale electricity market

16 March 2021

In the wake of Winter Storm Uri, Texas scrutinizes its deregulated electricity market.

CFTC final position rule limits enter into effect March 15

10 March 2021

The Final Rules aim to "prevent excessive speculation" and thus implement one of the remaining key provisions of Dodd-Frank.

Commodities News and Trends

10 March 2021

COMMODITIES NEWS AND TRENDS

Oil and gas companies commit to transparency on methane emissions reporting; CFTC adopts final position rule limits; consequences of volatile markets.

Reform to the Electric Industry Law: a new risk for energy projects in Mexico

10 March 2021

Foreign investors involved in energy projects in Mexico may wish to consider their rights and potential remedies under applicable investment treaties.

Imminence does not mean haste

4 March 2020

EU SUSTAINABLE FINANCE

Sustainability and ESG stewardship are at the forefront of investment managers' and investment funds' agendas under the combined pressure of investors and as a result of several important pieces of regulation becoming live. SFDR is one of them. It will become applicable in phases, the first deadline being as early as 10 March 2021.

A discussion of Colorado plugging and abandonment rules

2 March 2021

US OIL AND GAS PLUGGING AND ABANDONMENT RULES

Plugging and reclaiming requirements for non-injection oil and gas wells and well sites in Colorado, as well as implications for bankruptcies and approaches for buyers seeking to account for these rules in asset sale agreements.

Force majeure provisions and the ISDA Power Annex

22 February 2021

As climate change generates ever more severe weather events, market participants will likely need to assess the applicability of their force majeure claims under the Power Annex.

The Biden Administration's impact on oil and gas

18 February 2021

These actions will add an additional layer of regulations for oil and gas operations.

Protection provided for *bona fide* purchaser for value without notice in transaction involving First Nation lands

12 February 2021

Courts have long protected the interests of *bona fide* purchasers for value without notice in land transactions. However, seeking this protection can become far more complicated in land transactions where First Nations communities assert an interest and where such lands are held in trust. Despite these complexities, a recent decision from the Alberta Court of Queen's Bench has confirmed that the interests of a *bona fide* purchaser for value without notice of a breach of trust should be protected.

Corruption Perceptions Index 2020 - a regional perspective

11 February 2021

Last week Transparency International launched the 2020 edition of its Corruption Perceptions Index (CPI), which ranks 180 countries and territories by their perceived levels of public sector corruption, according to experts and business people, using a scale of zero to 100 (100 being very clean and zero being highly corrupt).

Boardroom Brexit: What the deal means for business

31 December 2020

[BOARDROOM BREXIT](#)

Welcome to this last edition of Boardroom Brexit, marking the end of the negotiations and the agreement of a new trade deal, the UK-EU Trade and Cooperation Agreement (TCA). In this edition, we summarise the impact of the deal on all aspects of business operations in one place – please use the hyperlinks below to help you navigate the report.

Boardroom Brexit: What the deal means for energy and climate change

31 December 2020

[BOARDROOM BREXIT](#)

The TCA regulates the trade in electricity and gas between the EU and the UK over interconnectors, provides for cooperation in respect of security of supply, the integration of renewables into their respective markets and cooperation to develop hybrid projects that combine interconnectors and offshore wind farms in the North Sea (thus opening up the potential for a North Sea grid), as well as ensuring open and fair competition and stipulating general safety standards.

Climate change convergence? The potential for global collaboration following China's momentous announcement

17 December 2020

With the election of Joe Biden, it is widely expected that the US will reengage with the international community in the fight against climate change and in efforts to reduce overall emissions.

CFTC's annual enforcement report touts record-breaking year

16 December 2020

CFTC releases the annual report from its Enforcement Division, and expects to continue prioritizing four key areas.

Commodities News and Trends

16 December 2020

COMMODITIES NEWS AND TRENDS

In the inaugural issue, three states collaborate on offshore wind project; record-setting year for CFTC enforcement; climate change lawsuit reaches Supreme Court - plus latest legal and regulatory developments in commodities trading.

Climate activism: Status check and opportunities for public companies

14 December 2020

The systemic risk of climate change is being discussed and managed in board rooms around the world.

Nasdaq proposes board diversity listing standards

8 December 2020

The proposal is the first of its kind among US exchanges and, if approved by the SEC, would mark an important step toward mandated diversity requirements for the boards of US-listed public companies.

Oil and gas operations in Latin America

3 December 2020

Addressing key operational and commercial challenges that are unique to Latin America.

Creating voluntary carbon markets: IIF recommendations and consultation – suggestions due by December 10

17 November 2020

The Taskforce's recommendations are based on core carbon principles to help establish standardized benchmark contracts for listing on exchanges and using existing infrastructure.

CFTC issues staff guidance on recognition of self-reporting, cooperation and remediation

3 November 2020

The recent guidance provides another benchmark that companies may use to demonstrate the strength and effectiveness of their internal policies to the public.

Assessing ESG factors in the energy sector

27 October 2020

ESG HANDBOOKS AND GUIDES

A reference tool for energy companies as they discuss and refine their ESG programs.

Replacing NAFTA: What the USMCA means for the future of North American trade and investment – a Q&A

26 October 2020

Contributors from the US, Mexico and Canada discuss several key considerations.

Venezuela: Recent, significant commercial arbitration developments include several Supreme Tribunal cases

26 October 2020

Recent significant developments in Venezuela's arbitration landscape.

Germany's New Foreign Direct Investments (FDI) Act took effect on 11 October 2020

19 October 2020

In addition to the intended amendments to the Foreign Trade and Payments Act Germany's Federal Government on 20 May 2020 has decided on a bill that broadens the scope and the scrutiny with regard to foreign investments.

China Enforces Tax Collection on Employees Working for Chinese-invested Enterprises Overseas

16 October 2020

With the recent IIT reform in 2019, and the introduction of a number of implementation rules (particularly the tax policy on overseas income), it appears the China tax authorities are taking a harder stance on how overseas income derived by China tax residents will be taxed in China, starting with Chinese expatriates working for Chinese state-owned enterprises.

The energy transition and renewable energy in Chile: Top points for foreign investors

8 October 2020

Chile has been actively addressing the energy transition for more than a decade, building a legal foundation that is attracting investment in renewable energy projects.

PACTA for Banks brings climate scenario analysis to financial institutions

7 October 2020

PACTA for Banks is a toolkit for financial institutions to measure the alignment of their corporate lending portfolios with climate scenarios across a set of key climate-relevant sectors and technologies.

CFTC sues foreign registered exchange for engaging in activity in the US and with US persons without proper US registration

6 October 2020

The CFTC renews its commitment to protecting the US commodities markets.

Mass layoffs and collective redundancies guide

6 October 2020

As COVID-19 continues to impact the global economy in unprecedented ways, companies that have had to scale back or shut down operations are bracing for what the next few months will bring, and what this means for their workforces. In this guide, we examine key considerations for employers looking to make permanent reductions in force across APAC.

New York Department of Financial Services issues circular on climate change and financial risks

1 October 2020

The NYDFS expects insurers to start integrating the consideration of financial risks from climate change into their governance framework, risk management processes and business strategies.

CFTC updates guidance on compliance programs and enforcement

29 September 2020

The Guidance is the latest effort by the CFTC to ensure the transparency of its processes for registrants and the public.

Three ESG steps to keep your project bankable in 2021

17 September 2020

Version four of the Equator principles will take effect on 1 October 2020, and it introduces three new requirements to the international environmental and social baseline for project finance.

Distributed generation: A rising energy market in Chile

16 September 2020

This growing market has features that make it attractive for investors in uncertain times.

Details of the second tranche of Hong Kong's Employment Support Scheme released

24 August 2020

On 18 August 2020 the Hong Kong government announced details surrounding the second tranche of the Employment Support Scheme. While the majority of the rules surrounding the second tranche remain largely the same as the first tranche, there are new penalties for employers who have fallen foul of a number of nebulous terms.

Guidance on Green Loan Principles and Guidance on Sustainability Linked Loan Principles

8 May 2020

These guidelines and standards portend an increase in sustainable finance documents and projects in the near future.

Cybersecurity: past is prologue

29 MAR 2016

During 2016, we will likely see another increase in cyberattacks, and we will see cybersecurity being taken more seriously by its potential victims.

Intellectual Property and Technology News (United States), Issue 23, Q3 2014

10 SEP 2014

INTELLECTUAL PROPERTY AND TECHNOLOGY NEWS

Our Intellectual Property and Technology News reports on worldwide developments in IP and technology law, offering perspectives, analysis and visionary ideas.

Patent wars: can the energy industry avoid them?

10 SEP 2014

Proactively navigating the challenges of protecting energy IP

Tax incentives in Puerto Rico: a quick introduction

13 JUN 2017

Puerto Rico offers a spectrum of economic incentives aiming to promote many key industries. This handbook offers a quick look at ten of the most significant of these incentives.

Public-Private Partnerships in Puerto Rico

21 MAR 2017

For those considering participating in P3s in Puerto Rico, this handbook summarizes the applicable legal framework and discusses why Puerto Rico is a favorable jurisdiction for entering into P3s.

Is it a new day for Jones Act enforcement? Maybe. A practical look at coastwise concerns

9 AUG 2016

The decision underscores the significance of each party's right to participate in the arbitration process and arguably expands the scope of existing arbitration jurisprudence.

EU: new obligations for digital services providers and operators of essential services

28 JUN 2016

In line with the EU's broader Cyber Security Strategy, the NIS Directive is a significant step towards a more secure cross-border cyberspace with a high shared level of network and information system security.

Electrify Africa Act is now law

2 MARCH 2016

The law demonstrates broad bipartisan support for a comprehensive US policy aiming to facilitate private financing and PPP structures as tools to develop power projects in sub-Saharan Africa, which should provide opportunities for investors, sponsors and lenders to advance their projects.

Slavery in the supply chain: new corporate reporting obligations for companies

9 DEC 2015

HEALTH, SAFETY AND ENVIRONMENTAL MATTERS SERIES

The UK's Modern Slavery Act 2015 is in force, imposing on companies new reporting requirements and new enforcement powers, including the creation of an Independent Anti-Slavery Commissioner.

Federal district court decision appears to clear way for Cape Wind

24 MAR 2014

The Federal District Court in Washington, DC has issued a lengthy ruling that appeared to substantially clear the way for Cape Wind, a large proposed offshore wind farm on Horseshoe Shoal in Nantucket Sound south of Cape Cod, Massachusetts.

Historic reform in Mexico clears the way for foreign investment in energy sector: 5 key aspects

19 DEC 2013

A clear roadmap for the regulation of hydrocarbons

The EU looks at fracking: regulations taking shape

21 NOV 2013

US commits \$7B to ambitious Power Africa initiative

2 JUL 2013

A new initiative aiming to double access to power in sub-Saharan Africa

New York Assembly passes two-year fracking moratorium, while Illinois moves forward

11 MAR 2013

British government lifts year-old fracking moratorium

20 DEC 2012

The British Government has announced it is lifting its ban on hydraulic fracturing (fracking) to extract natural gas from shale deposits.

With revised proposed regulations, "fracking" returns to the fore of New York State's energy policy

11 Dec 2012

New York Governor Andrew M. Cuomo's administration has issued revised proposed regulations for high-volume hydraulic fracturing (fracking or HVHF) in New York State, a move that will avoid sending the entire process back to the drawing board.

Thinking strategically on pipe build-out for the shale boom

1 Oct 2012

Recent developments in horizontal drilling techniques have propelled natural gas production from shale formations to the forefront of domestic oil and gas production today. This rapid expansion is presenting opportunities and challenges for producers and pipeline developers seeking to capitalize on the need to move this gas to market.

The final countdown: Dodd-Frank compliance to begin as SEC and CFTC issue key rules re swaps activities

11 Jul 2012

CFTC issues two proposals affecting those engaging in swaps activities

10 Jul 2012

Marcellus Shale pipeline decision provides guidance on scope of environmental "cumulative impacts" analysis for projects requiring government approval

20 Jun 2012

The Second Circuit has issued a decision providing further clarity on the scope of "cumulative impacts" analysis required under the National Environmental Policy Act (NEPA).

CFTC approves commodity options final rule, establishing trade option exemption

30 Apr 2012

CFTC issues the first of the two rules that will shape the post-Dodd-Frank world

19 Apr 2012

On Wednesday, April 18, 2012, the Commodity Futures Trading Commission met and issued the first of the two "pillar" rules that will shape the landscape of the CFTC's regulation of swaps under the Dodd-Frank Wall Street Reform and Consumer Protection Act.

Pennsylvania tightens rules for drilling in the Marcellus Shale

1 Mar 2012

Pennsylvania Governor Tom Corbett has signed into law Bill 1950, a set of amendments to the Pennsylvania Oil and Gas Act that set forth new standards and requirements for natural gas drilling operations in the Marcellus Shale formation in Pennsylvania.

States' regulations on Marcellus Shale gas extraction continue to take shape

30 Nov 2011

Marcellus Shale drillers face potential liability under Clean Air Act

17 August 2020

DLA Piper has advised Swiss-based Syngenta Group on its acquisition of Sensako Group, a South African seeds company engaged in the breeding and the commercialization of agronomic crops.

Sustainability and ESG

More than 35 countries around the world have declared a state of climate emergency, with many jurisdictions, among them Sweden, the UK, France, Denmark and New Zealand, having legislated net-zero emissions targets.

The International Energy Agency's (IEA) recent "Net Zero by 2050, A Roadmap for the Global Energy Sector" report confirms the critical role the sector plays.¹ Currently the sector is the source of around three-quarters of greenhouse gas emissions, yet also holds the key to averting the worst effects of climate change. Based on the IEA's scenario, deep emission cuts until 2030 must come from existing commercially available technologies. This will require the deployment of all available clean and efficient energy technologies and a massive scale up of solar and wind technologies. In addition, hydropower and nuclear, the two largest low-carbon sources available today, will be an essential foundation for the transition. After 2030, the biggest innovations and opportunities will be found in advanced batteries, hydrogen, electrolyzers, and direct air capture and storage.

Other key Sustainability and ESG (SESG) issues affect the energy and natural resources sector (ENR) in profound ways and environmental factors are only part of the picture: social and governance elements are also key drivers of success. For some companies, protecting human rights, protecting a watershed, and considering long-term impacts on local communities is crucial. Actions such as linking executive remuneration to delivery of SESG targets is currently best practice and demonstrates commitment. The spectrum of issues is broad and the geographic location and specific asset characteristics essential. The risks themselves are also

dynamic and non-linear, introducing additional challenges in identifying and addressing them—unless they are viewed through an integrated sector lens.

Accelerating the transition to a decarbonised, climate resilient economy also comes with an essential requirement: a just and fair transition. This ‘just transition’ needs to support affected workers and vulnerable communities, so no one is left behind.

Our Sustainability and ESG team within the ENR sector is well versed in these complexities. We understand that each company's needs differ enormously, depending on sector, strategy and context. We can address those challenges and provide tailored advice in areas of sustainable finance, climate change, corporate PPAs, human rights, worker protections, supply chains and community inclusion. We know that companies are seeking to demonstrate that they are incorporating SESG into their strategies and operations and that they recognize the hazards and material risks which may arise from inadequate prioritization of SESG concerns.

RENEWABLES

The transition to a net-zero economy means renewable energy solutions are in high demand. However, for renewable energy companies, climate change issues are only part of the story. Even renewable energy can be unsustainable if it does not adequately integrate SESG factors. Aspects such as supply chain management, data security, human rights and materials sourcing, among others, need to be carefully considered. For instance, supply chain issues for solar projects are substantial: panels may be manufactured in another country, even in another hemisphere, and then shipped around the world to the solar park location. Similarly, developing wind farms often means constructing and maintaining facilities in remote locations, and therefore addressing health, safety and employment issues, in addition to environmental and supply chain concerns. A recycling plant can be a great initiative, but is it sustainable if the waste trucks run on diesel fuel and the drivers are paid below the minimum wage? The need to consider SESG exists throughout the life cycle of a renewable energy project, be it in planning, developing, operating or decommissioning.

OIL AND GAS

The energy transition aims to transform the global energy sector from fossil-based to net-zero greenhouse gas emissions by 2050. We are witnessing major integrated oil and gas companies committing to aligning their portfolios with the Paris Agreement goals, with many energy majors investing more and more in their renewable energy offerings.

Forward-thinking companies in the industry understand that being sustainable means reviewing all parts of the business, including health and safety issues on rigs, product design to ensure the safe and effective transportation of substances at all stages of the process, and transparent risk mitigation and management.

When we advise energy majors on sustainability issues, generation of energy from renewable sources is a benefit, yet by no means the sole element of the approach to sustainability.

MINING

For the mining sector, transitioning to net-zero emissions is also a key element. Mining operations need to be taken into account, but so do the indirect emissions that occur in the value chain, including both upstream and downstream. In addition, businesses will need to improve their collaboration with customers to become resource efficient and to reuse and recycle energy-intensive commodities and minerals, such as steel and copper.

Furthermore, the ever-growing demand for new technology components and energy storage solutions means that the mining sector is experiencing a shift in demand toward higher production of key minerals. This change comes hand in hand with environmental and social impacts that need to be mitigated and managed appropriately and transparently. Human rights and local community engagement are vital elements of sustainability.

Shifting investor and consumer expectations are also a key driver. Investors are increasingly calling for reporting and transparency requirements regarding a company's material ESG factors and how these integrate into the company's governance, strategy, risk management, metrics and targets. Access to capital and the cost of capital are also being progressively linked to ESG performance and impacts.

WATER

Building water resilience and providing for water security are essential issues around the world. A product's efficient use of water over its lifetime as well as the water footprint of its production are factors that will grow in prominence as water shortages, climate perils and chronic impacts of climate change increase.

Another aspect of industrial consumption of water arises from water pumping and distribution, which generate significant levels of

emissions. Using renewable energy for these operations will become important for the water sector. Payment for ecosystem services and nature-based solutions (aiming to help protect watersheds and secure access and supply) are policies that are already gaining traction in large jurisdictions such as the European Union.

¹IEA, Net Zero by 2050, A roadmap for the Global Energy Sector (May 2021)
