Licensing is a very broad concept —much broader than the commonly-held view that licensing only relates to software, art, content, or other registrable intellectual property rights such as patents, trademarks, and copyright. While licensing certainly captures these concepts, any time a business permits another party to use something it owns, it is licensing that something to that other party. And while there are technical, legal differences between leases and licences that are very important when applying to physical or real property, the lines are blurry and leases grant very different rights and interests.
