

## Healthcare

The healthcare industry around the world is intricate and evolving. Healthcare laws and regulations affect all companies at some level. The healthcare industry is among the most highly regulated in the world, and all employers must comply with the medical privacy protections and healthcare benefits afforded their employees. Multinational companies must navigate sometimes quite divergent payment and reimbursement regimes and the pharmaceutical and medical device approval rules of multiple national governments, as well as regional and international requirements. Healthcare providers are subject to the licensing and oversight rules of every jurisdiction in which they do business.

Our lawyers represent healthcare clients all around the world. We live and work where our clients live and work. And we work together across our offices throughout Asia Pacific, Europe, the Middle East and the United States, combining global strategy with local implementation.

We counsel the healthcare industry in these areas:

- Antitrust and competition
- Project finance
- Healthcare transactional
- Healthcare fraud and compliance
- Health insurance and managed care
- Healthcare regulatory
- Healthcare technology
- Employment
- Payment reimbursement disputes
- Pensions
- Personal injury and product liability litigation
- Privacy
- Professional liability and litigation
- Restructuring
