

Teollisuus

The industrials sector is continually evolving and crossing borders. Global economic uncertainty, political instability, and its impact on trade, climate change, digitalization, automation and disruptive business models are just a few of the many challenges businesses in the industrials sector are currently facing.

Prudent businesses in this rapidly changing sector turn to lawyers who have cross-disciplinary knowledge and on-the-ground presence in local markets, who are able to advise clients on their day-to-day and strategic concerns wherever they choose to do business. With offices in over 40 countries throughout the world, we offer a dedicated team that understands the sector, the challenges it faces and the pragmatic, cost-effective solutions that work for our clients. We are proud to support the diverse needs of our global client base, which includes many of the most successful industrial companies worldwide across our core areas:

- Aerospace and defense
- Automotive
- Chemicals
- Manufacturing

We help our clients on important issues affecting the industry, such as:

- Acquisition, asset and export finance
- Brand protection, patents, licensing and IP
- Commercial and procurement contracts and outsourcing
- Cybersecurity
- Data protection
- Digitalization and IoT
- HR, employment, employee benefits and pensions
- Litigation and arbitration
- M&A and international corporate restructurings (ICR)
- Product compliance and safety
- Real estate and real estate finance
- Regulatory advice, including on environmental, health and safety (EHS) matters
- Restructuring
- Risk, governance and compliance, including anti-bribery and corruption
- Supply chain management, including distribution/agency agreements and contracts
- Tax, including import and export, transfer pricing and sanctions

Focus on the industrials sector

18 January 2022

[UNDERSTANDING THE UK NATIONAL SECURITY & INVESTMENT REGIME PODCAST](#)

In the third episode of the series we turn our focus to specific sectors. Sarah Smith and Matt Evans are joined by DLA Piper's defence sector specialist, Maria Pereira to discuss the impact of the regime on the industrials sector, specifically in relation to the defence, military and dual-use, advanced materials and satellite and space sectors.

New antidumping and countervailing duty petition: Sodium nitrite from India and Russia – consequences for industry and downstream consumers

18 January 2022

The petitioner alleges dumping margins ranging from 60.3 percent to 75.1 percent for India and from 187.8 percent to 265.5 percent for Russia.

New antidumping and countervailing duty petition: barium chloride from India – consequences for industry and downstream consumers

18 January 2022

The petitioner alleges a dumping margin of 235.88 percent along with an unspecified total level of subsidies of at least 1 percent.

New California law adds significant restrictions for recycling claims on products and packaging: action steps

6 January 2022

The law affects any product or packaging that fails to meet a California regulator's strict recyclability criteria. Compliance is crucial.

New antidumping duty petition: lemon juice from Brazil and South Africa – consequences for industry and downstream consumers

5 January 2022

The petitioner alleges dumping margins of 555.22 percent for Brazil and 128.61 percent for South Africa.

A legal overview

4 January 2022

[UNDERSTANDING THE UK NATIONAL SECURITY & INVESTMENT REGIME PODCAST](#)

In episode 2 of our podcast series we discuss the legal context of the regime: how it will operate and the implications for businesses. In particular, the legislation - which comes into force today, 4 January - has wide reaching implications for M&A involving businesses or assets connected with the UK.

California regulations on diverting organic waste go into effect January 1: new rules affect municipalities and food sector, bring opportunities for composting and biofuel businesses

16 December 2021

As more regulations implementing SB 1383 come into effect in the coming years, the demand for permissible ways to dispose of organic waste will only increase.

What's driving the new National Security and Investment Regime

12 December 2021

[UNDERSTANDING THE UK NATIONAL SECURITY & INVESTMENT REGIME PODCAST](#)

Episode 1 of our new Podcast series discusses what is driving the new National Security and Investment Regime. What is the political context for the new regime? Who and what is driving the pressure to strengthen investment screening both in the UK and internationally? Sarah Smith, Partner in DLA Piper's Competition practice is joined by Lord Gavin Barwell, Strategic Advisor and former Chief of Staff to Teresa May and Paul Hardy, Head of UK Government Affairs at DLA Piper to discuss the context of the new regime.

The Glasgow Climate Pact: What does it mean for Business?

23 November 2021

In this article, members of our Sustainability and ESG Steering Committee share their thoughts on eight key themes emerging from COP26 and what they mean for business.

Global Reporting Initiative updates its Universal Standards – revisions will affect ESG reporting by numerous businesses

3 November 2021

GRI 11 outlines topics likely to be material for oil and gas organizations and lists relevant disclosures, such as air emissions, climate adaptation, and water and effluents.

US lifts Section 232 tariffs on steel and aluminum from the EU effective January 1, 2022 – continues similar negotiations with Japan

2 November 2021

The agreement will apply to US imports made on or after January 1, 2022.

The Corporate Profits Minimum Tax Proposal – key elements

28 October 2021

The proposal is likely to become part of the final reconciliation measure.

Treasury releases 2021 Sanctions Review: Its key recommendations and their implications for the private sector

The emergency standards affect most companies with California-based employees.

Creating voluntary carbon markets: IIF recommendations and consultation – suggestions due by December 10

17 November 2020

The Taskforce's recommendations are based on core carbon principles to help establish standardized benchmark contracts for listing on exchanges and using existing infrastructure.

Schrems II: The next chapter – EDPB issues recommendations on supplementary measures for transfers of personal data to the US, European essential guarantees for surveillance measures

13 November 2020

The measures could have significant impacts on international data transfers, particularly those between Europe and the US, which drive over a trillion dollars in trade every year.

Contracting for the climate: The Climate Contract Playbook is a trove of climate clauses

11 November 2020

Contracts have become an essential vehicle for companies seek to mitigate their environmental risks and limit their carbon footprints.

Replacing NAFTA: What the USMCA means for the future of North American trade and investment – a Q&A

26 October 2020

Contributors from the US, Mexico and Canada discuss several key considerations.

China Enforces Tax Collection on Employees Working for Chinese-invested Enterprises Overseas

16 October 2020

With the recent IIT reform in 2019, and the introduction of a number of implementation rules (particularly the tax policy on overseas

income), it appears the China tax authorities are taking a harder stance on how overseas income derived by China tax residents will be taxed in China, starting with Chinese expatriates working for Chinese state-owned enterprises.

COVID-19 – Galvanising your business against supply chain and customer insolvency risk

7 October 2020

The risk of unforeseen counterparty customer or supplier financial distress and failure amidst the on-going challenges for businesses from COVID-19 means that pre-emptive legal and operational protections against the risk of heavy financial loss or business disruption from customer/supplier failure are more valuable than ever.

Mass layoffs and collective redundancies guide

6 October 2020

As COVID-19 continues to impact the global economy in unprecedented ways, companies that have had to scale back or shut down operations are bracing for what the next few months will bring, and what this means for their workforces. In this guide, we examine key considerations for employers looking to make permanent reductions in force across APAC.

PFAS: in California, regulators put cleanup levels on hold, but announce major data hunt

7 MAR 2019

This data hunt will affect thousands of facilities, drinking water systems and private drinking water well owners.

DLA Piper advises MKS Instruments on USD6.5bn acquisition of Carlyle-backed Atotech

2 July 2021

DLA Piper has advised MKS Instruments, Inc., a global provider of technologies that enable advanced processes and improve productivity, on its acquisition of Atotech Limited, a leading process chemicals technology company and a market leader in advanced electroplating solutions, backed by buyout firm Carlyle Group Inc.

DLA Piper announces new sector leadership

10 March 2021

DLA Piper is pleased to announce several recent changes to the firm's sector leadership.

DLA Piper advises BASF in the sale of its Kankakee, Illinois, manufacturing site and certain associated business divisions to One Rock Capital Partners

22 December 2020

DLA Piper represented BASF Corporation in the sale of its manufacturing site in Kankakee, Illinois, and the associated businesses of vegetable-oil-based raw material sterols and natural vitamin E, anionic surfactants and esters produced there to an affiliate of One Rock Capital Partners, LLC, a US-based private equity firm.

Sustainability and ESG

Businesses in the industrials sector face diverse and complex sustainability and ESG challenges, depending on where they are in their sustainability journey. While the sector has been quick to adapt to technological changes, it is now being tested by more sweeping changes in the transition to sustainability – affecting the business model, strategy and operations.

The focus of the manufacturing, automotive and chemicals industries has been on environmental issues, such as energy and waste management, reducing greenhouse gas emissions and improving efficiency of design and resource use throughout the product life cycle. Companies in aerospace and defense have been predominantly grappling with social and governance issues, such as demonstrating their commitment to human rights, anti-corruption, business integrity and transparency.

The following key sustainability themes cut across the industrials sector:

- **Towards a circular economy:** Businesses in industrials have been reassessing materials sourcing, energy use and waste management in line with circular economy principles. Some companies have gained revenues, market leverage and consumer support from making improvements to product design and life-cycle management which increase sustainable sourcing and material reuse while striving for a zero-waste supply chain. The automotive industry, for example, has responded to consumer demand for open business models and closed-loop value chains, with some car companies upcycling used materials to reduce total emissions.
- **Towards a low-carbon economy:** The industrials sector also has a leading role to play in driving the transition to a net-zero future. The overall environmental impact and carbon footprint of the sector remains significant, considering the high consumption of energy and resources and hazardous waste management involved in business operations. Some reductions in greenhouse gas emissions have been achieved through operational efficiencies, including energy efficiency, waste reduction and the increasing use of renewable energy sources. While some companies have remodeled their business strategy and brand on environmental sustainability principles, it can be more challenging for others depending on their products, operations and hurdles that may limit immediate transition. Companies not focused on identifying transition opportunities risk regulatory action, consumer backlash, investor withdrawals and/or litigation – as potential for loss of value as well.

- **Improving product quality and safety:** For companies in the chemicals business, a customer-centric approach has been essential for focusing on public trust following concerns with product quality and safety, marketing practices and concerns of potential anti-competitive behavior. The manufacturing and automotive industries have also had to address rising consumer expectations on demonstrating product quality and safety, in addition to meeting regulatory compliance standards.
 - **Improving employees' health and safety:** There are growing demands from employees for industrial companies to assure occupational health and safety, given the nature of the work and risk of critical safety incidents if safety processes and procedures are not thorough and followed. The most successful companies have proactively put in place internal procedures to ensure workplace health and safety beyond what is required by law, thereby minimizing potential for injury claims and reputational risks.
 - **Developing internal procedures to prevent crises:** Companies in the defense industry are particularly exposed to human rights abuse allegations and other ethical issues. However, such controversies have decreased in recent years as several companies have established internal systems to prevent complicity in human rights violations, especially in relation to arms proliferation in conflict areas. The most successful of these include human rights due diligence processes which go beyond the minimum required by government licensing regimes.
 - **Improving transparency and reporting:** Across the industrial sector, there is a shift towards mandatory sustainability and climate-related reporting and disclosure obligations, such as on carbon emissions and energy use. More broadly, transparency is an important issue for the aerospace and defense sector, considering the sensitive nature of the business and vulnerability to corruption risks. In this subsector, a small but growing proportion of companies have taken a proactive approach to increasing transparency and integrity measures and preventing corruption.
-

To discuss the implications of these issues for your business, please contact our ESG leaders.
