Public-private partnerships for infrastructure investment: a global perspective

18 March 2021

In a new global report, produced in partnership with Global Infrastructure Investor Association (GIIA), DLA Piper assesses the case for

PPPs, backed by multijurisdictional analysis from our projects and infrastructure lawyers around the world as well as insight from leading infrastructure investors who are fellow members of the GIIA.

Infrastructure in a post-COVID-19 world

28 April 2020

Infrastructure is famously prized by investors for stability and predictability – COVID-19 has turned this on its head in the short term and undoubtedly will have a huge impact on the sector in the longer term. At the same time, it will create significant opportunities for investors and other stakeholders. Attitudes to risk and how it is shared may well have changed due to COVID-19 and its impact, but in reality will investors and lenders turn their backs on infrastructure as an asset class? Unlikely.

Building tomorrow's infrastructure

Investors expect boom in European data centres in the next two years

3 December 2019

The vast majority (92%) of debt and equity investors surveyed expect the overall value of investment into Europe's data centre infrastructure to increase over the next 24 months, according to research commissioned by DLA Piper and published today.

Data centres are used by organisations for the remote storage, processing and distribution of large amounts of data and are currently estimated to use 3-4% of world's power¹. According to DLA Piper's report *European Data Centre Investment Outlook: Opportunities and Risks in the Months Ahead*, investors anticipate an investment increase in data centres of between 10% and 29% over the next two years.
