Nandan Padmanabhan's practice focuses on high-stakes intellectual property litigation matters involving electronics, software and wireless patents, and software trade secrets. He advises clients regarding intellectual property protection and technology-related agreements, often advising on highly technical subject matters for clients.

- Patent Litigation
- Intellectual Property and Technology

Nandan's experience includes tackling multiple cases in federal district courts involving the defense of a large multinational consumer electronics corporation against allegations of infringing patents relating to electronics, software and wireless technologies. He also has extensive trial experience that includes defending a large multinational consumer electronics company against allegations of infringing wireless standards-essential patents at the International Trade Commission, and pursuing trade secret misappropriation claims on behalf of a software corporation in federal court.

Prior to law school, he utilized his undergraduate education in computer engineering to design and develop custom software solutions and manage implementation teams for a large bank as well as a consulting firm.
