

Patent Litigation

Protecting valuable inventions in a highly competitive global environment has become increasingly challenging for multinational businesses. With the significant rise in patent litigation and with damages exceeding the billion-dollar mark in the US, the risks and opportunities facing companies are higher than ever. Whether enforcing your patents against others or defending you against claims of patent infringement, DLA Piper has the experience to help you succeed.

With over 130 patent litigators on the ground in key jurisdictions worldwide, DLA Piper is uniquely positioned to help companies successfully navigate their patent matters around the globe. Our team of over 70 patent litigators located in the major US cities alone, plus an additional 60 patent litigators in other key jurisdictions worldwide, know the laws, the courts and the judges in the jurisdictions where most patent disputes occur.

We often manage related patent matters in multiple US jurisdictions simultaneously, including the ITC. With our global reach, we are also accustomed to acting for clients in resolving multi-jurisdictional patent disputes in the US, Canada, Europe and Asia Pac. In particular, we have significant experience with cross-border patent litigation involving the US, Canada, France, Germany, Italy, the Netherlands, Poland, Turkey, UK, China and Australia, as well as other countries worldwide. We are highly adept at developing and implementing global patent enforcement strategies for our clients and strategically selecting venues to increase their probability of success.

Our deep technical bench includes lawyers with advanced degrees and/or experience in most technical areas, especially electronics, computer science, telecommunications and wireless, pharma and biotech, medical devices, chemical engineering, materials and automotive – so we can quickly understand your technology and industry.

We try cases – and we win them. Since we are trial lawyers, we develop potential trial themes early and use them to evaluate the evidence by both parties. We are known for our ability to explain complex technologies to judges and juries. Since our opponents know we are not afraid to go to trial, we are very often able to reach a favorable settlement. We also have a leading appellate practice, and have helped clients hold on to their victory or reverse any adverse result. Additionally, we have extensive experience handling inter partes reviews (IPRs) and post-grant reviews (PGRs) in the US, as well as supporting clients in opposition proceedings before the European Patent Office.

We do not represent patent assertion entities ('patent trolls'). We have deep experience opposing such entities and have developed successful, cost-effective litigation strategies against them.

- Advising a global tech giant in relation to a high profile, multijurisdictional patent litigation case, our global team successfully represented our client in a 27-patent case in the Northern District of Texas and three High Court trials in the UK, resulting in a confidential worldwide settlement. This was the biggest patent case before the UK Courts in 2009 and 2010. This matter involved strategic, cross-border coordination of complex patent litigation among the US, the UK, and other jurisdictions. It also involved complex issues relating to antitrust and anti-competition claims, standard-setting claims and defences and issues concerning what constitutes a fair, reasonable and non-discriminatory (FRAND) licensing commitment in the standard-setting context.
- Representing a data protection software client in a patent trial in the popular US District of Delaware, we won a full defense jury verdict. Our client's rival asserted that our client and the other defendants infringed two patents relating to fundamental technology for anti-virus software. Their rival had previously won a jury verdict and a permanent injunction against another anti-virus software company. However, at trial our client demonstrated that it invented the same technology years before their rival filed for its patents, and following a three-week trial before Chief Judge Gregory Sleet, the jury unanimously agreed, finding both asserted patents invalid and not infringed. In addition, the jury found all asserted claims were invalid and rendered obvious over several prior art references, including our client's own products developed years before their rival filed the claim. The lawsuit was unique in part because it involved global discovery efforts (US, UK, Israel, Czech Republic and France) and several interrelated lawsuits spanning multiple years.
- Representing a US-based technology company as lead counsel in an ITC investigation, we helped our client prevail in an important case in which their competitor alleged that our client's SRAM chips infringed four patents. The Administrative Law Judge's Initial Determination found no violation of Section 337, finding that none of the four patents was infringed and that the Complainant had failed to establish a domestic industry as to any of the four patents. The Commission subsequently affirmed the finding of no violation on each of these grounds and additionally found the asserted claims of one of the patents invalid.
- Representing a worldwide airline in a high profile, cross-border patent litigation matter regarding three patents and design rights protecting its innovative seating system, we secured our client's success. In a complex web of cases involving the seat manufacturer and several airlines centred around the UK, we successfully halted sales of a rival seating system which took advantage of our client's innovation. Involving legally complex issues, these cases established legal precedent on a number of matters, going all the way to the UK Supreme Court. This matter demonstrated the value of our strong global patent team, as we were able to quickly (sometimes mid-hearing) and cost effectively investigate the legal position in other countries on issues where there was no settled position in the UK, including in France, Germany, The Netherlands, Spain, Italy, Australia and the US. Our comprehensive coverage enabled us to obtain foreign case law and commentary which supported our client's position and refute mischaracterisations of the foreign law position raised against our client.
- We successfully protected the exclusivity in Australia of one of the key products of a leading global pharmaceutical company, including obtaining an interlocutory injunction against a competitor preventing it from launching its generic products. The matter will proceed over the next year to final resolution of the infringement and patent validity issues
- Advising a global, NYSE-listed medical technology manufacturer of a drug delivery system in patent infringement proceedings in the UK, France and Germany, relating to patents for syringe pump drivers.
