Gareth Stokes focuses on AI, information technology, strategic sourcing and intellectual property-driven transactions.

Gareth is part of the leadership team for DLA Piper's global AI Practice Group.

He enjoys nothing more than advising on cutting edge technology transactions. This includes the design and training of AI models, collection and use of data, and the increasing array of specialist hardware available to run these AIs more efficiently.

In a ubiquitously connected world, technology issues are more often global rather than local, and the largest projects tend to involve innovative contractual structures. Gareth has extensive experience with complex contracting, including joint venture arrangements, multi-level framework and call off structures, trust arrangements and other multi-contract arrangements.

- Intellectual Property and Technology
- Technology Transactions and Strategic Sourcing
- Data Protection, Privacy and Security

- Technology
- Financial Services
- Insurance
- Life Sciences

- Advising a high-tech consumer electronics company on various global outsourcing projects, including the outsourcing of finance & accounting, indirect procurement, IT service desk, infrastructure and application development services.
- Advising a global pharmaceutical company on its 'digital garage' function for identifying and investing in early stage AI projects and tech-driven programmes.
- Advising the world's largest online retailer on various aspects of its artificial intelligence strategy, and its responses to various legislative consultations.
- Advising a major European bank on various business-critical ITO and BPO deals, including the outsourcing of its hosting & storage, networks and security operations functions. In each case the projects involved working with the bank team to design suitable legal and commercial models, and running multi-bidder procurements. Contracts included mechanisms to incentivise co-operation between suppliers, and develop a trusted and interconnected group of IT service providers for the Bank's operation.
- Advising a premium car manufacturer on a wide range of commercial, technology and outsourcing projects.
- Advising a global insurance and financial services organisation on the legal, commercial and European regulatory aspects of the outsourcing of various of its IT and back office functions.
- Advising a high profile global electric vehicle manufacturer on various aspects of its European sales and service operations.

- Advising a digital therapeutics high growth company on its commercial arrangements and data sharing arrangements with several major primary care and medical devices businesses.
- Advising various major UK high-street banks on a wide range of IT and sourcing issues, including complex trusts arrangements in the context of the outsourcing of card processing for co-branded credit cards.
- Advising a global pharmaceutical company on projects related to a combination wearable medical device and AI powered app for managing diabetes.
- Advising a major global pharmaceutical company on a wide range of ITO, BPO and brand disposal activities (manufacturing lines, regulatory consents, IP portfolios).
- Advising the selected private sector partner on the outsourced services elements of the MyCSP mutual joint venture to deliver civil service pensions

CREDENTIALS

Professional Qualifications

- Solicitor of the Senior Courts of England and Wales

Prior Experience

Gareth has spent periods on secondment with the legal teams at both major international supplier of IT and outsourcing services, and a leading global pharmaceutical company.

Recognitions

Recognised in *Chambers & Partners* as "an excellent source of information and wisdom and a repository of all useful knowledge when it comes to technical matters."

Episode 3: Key takeaways when contracting for AI

8 July 2022

Artificial Intelligence projects: Dispute prevention and resolution

Things will go wrong with AI contracts no matter how hard you plan so it is best to prepare from the outset. In this clip, DLA Piper's Gareth Stokes and Phillip Kelly, plus Matthew Lavy, Iain Munro and Rebecca Keating of 4 Pump Court, consider key takeaways when contracting for AI, such as the importance of pre-contract due diligence, things to include in AI contracts and what to do if things go

wrong.

Episode 2: The explainability challenge

30 June 2022

Artificial Intelligence projects: Dispute prevention and resolution

What happens if an AI system produces an unexpected or incorrect result? Can you open up the 'black box' to identify what went wrong? In this clip, DLA Piper's Gareth Stokes and 4 Pump Court's Matthew Lavy discuss the "explainability challenge" and the legal implications for testing and performance.

Episode 1: Concepts when contracting for AI

22 June 2022

Artificial Intelligence projects: Dispute prevention and resolution

What are the key concepts you need to know about when negotiating software and services contracts involving AI? In this clip, Gareth Stokes, Partner in our global AI Practice Group, talks about the four key components which are specific to AI and need to be considered: the AI Model, the Software, the Trained Model and the Data.
