

Technology in Ireland

20 January 2022

By: Mark Rasdale | Edel O'Kelly | Alice Duffy

DLA Piper - Ireland Tech Sector Film from DLA Piper on Vimeo.

In this video, Mark Rasdale, Partner, outlines how Ireland is an ideal bridge for tech multinationals from the US and elsewhere looking to consolidate businesses in Europe and beyond. Ireland's digital sector accounts for more than 13% of its GDP and over the past decade has seen year-on-year growth. Over 30% of Europe's data is stored in Ireland and the top ten global software and born-on-the internet companies are here.

As Ireland's only globally integrated multidisciplinary law firm, we minimise the friction created by borders and cultural differences. We get better client results through deep international sector knowledge and full-service legal support. Our technology sector team in Ireland is part of one global group spanning 40 jurisdictions.

If you've got technology business in Ireland and there are challenges on which you'd value a fresh perspective, we'd love to hear from you.
