

Technology

DLA Piper works with many of the world's leading technology companies, offering advice throughout a broad range of areas - from corporate transactions to IP protection, patent law and litigation, and including regulatory, compliance, employment and contracting issues.

DLA Piper's global technology sector lawyers work across practice areas and offices to support technology clients wherever they do business. From startups to fast growing and mid-market businesses to mature global enterprises, our clients are companies that develop or create technology, are enabled by technology, or whose business model is fundamentally based on technology. Our technology sector clients include companies in the following areas:

- [Non-fungible tokens \(NFTs\) and Digital Assets](#)
- Software
- Computer hardware
- [FinTech](#)
- PayTech
- InsureTech
- [PropTech](#)
- [Artificial intelligence and robotics](#)
- [Blockchain](#)
- [Unmanned Aerial Systems and Unmanned Aerial Vehicles](#)
- [Telecommunications](#)
- Games and entertainment
- Online commerce and new media
- IT and outsourcing services
- CleanTech
- Semiconductors
- [Internet of Things](#)
- [Automated, Connected and Electric Car](#)

We advise technology companies throughout the business life cycle. We help startups get organized and funded and assist both growing and established technology companies in employment matters, commercial and technology transactions and IP patent protection strategies.

Continued growth means a steady need for legal support in such areas as M&A, IPOs and dispute resolution. As companies expand their business internationally, we help with international tax planning, regulatory compliance, establishment of new entities and compliance with local laws for employment, benefit plans and company policies. For the largest companies, we partner with in-house legal departments, providing additional experience and capacity to address all these areas.

More than 600 dedicated lawyers globally

Africa Connected: Digital transformation trends and challenges

27 April 2021

AFRICA CONNECTED

ISSUE 6

Digital transformation trends and challenges in Africa is the theme of this edition. We have articles on issues ranging from the use of artificial intelligence tools in the legal sector as well as regulatory challenges to satellite broadband providers, to open banking and financial inclusion across the continent.

Aiscension: AI in the legal sector

27 April 2021

AFRICA CONNECTED

One area of risk which AI can help mitigate, and detect, is cartel activity. DLA Piper has recently launched Aiscension to help detect and prevent cartel activity in collaboration with Reveal Data.

Data collection in the health and education sectors: An African perspective

27 April 2021

AFRICA CONNECTED

There is no doubt that the pandemic has adversely affected education and health services in Africa and elsewhere. The accelerated digitization has led to increased collection of data in all its ramifications. All of these have raised privacy and data protection concerns due to the sheer volume of personal data being collected.

Decision Support Systems: Using technology to enhance decision-making in the African legal industry

27 April 2021

AFRICA CONNECTED

To meet the difficulties of decision-making in the digital information age, the global legal industry is gradually transitioning to automated systems that use predictive algorithms to support and enhance the decision-making process, generally referred to as decision support systems (DSSs).

Digital transformation and financial inclusion in Nigeria

27 April 2021

[AFRICA CONNECTED](#)

Innovations such as blockchain, mobile payments and savings, peer-to-peer lending platforms, crowdfunding and similar internet-based solutions have radically transformed the financial services landscape in Nigeria. However, beyond the noteworthy advancements in this sector, a key concern is giving the country's growing population access to these innovative solutions.

Digitization: Facilitating the implementation of AfCFTA

27 April 2021

[AFRICA CONNECTED](#)

Digitization and the use of technology presents a major opportunity for the African continent in the implementation of AfCFTA. Pre-existing challenges in the nature and extent of infrastructure on the continent can be avoided, efficiencies can be leveraged and innovative solutions suitable to the African continent can be harnessed.

Expanding into Africa: Regulatory challenges for satellite broadband providers

27 April 2021

[AFRICA CONNECTED](#)

In this article, we set out some examples of challenges for satellite broadband service providers expanding into Africa, by reference to specific African jurisdictions and identify potential workarounds, where available.

Open banking in Africa after COVID-19

27 April 2021

[AFRICA CONNECTED](#)

Anchored on providing better customer experiences, open banking has stirred a lot of interest in Africa, including banking apps with detailed analytics of finances, the ability to send money from one bank to another using mobile phones, or the ability to transfer money from one telecoms network to another.

Smart contracts and trust in Africa's e-commerce revolution

27 April 2021

[AFRICA CONNECTED](#)

The focus of this article is trust, and the question of whether smart contracts offer a unique opportunity for the issue to be addressed in African e-commerce.

The development of the digital economy: Competition regulation in Africa

27 April 2021

[AFRICA CONNECTED](#)

Business is characterized by new competitive practices in the digital market, mergers and acquisitions of market shares and new forms of monopolies by major global companies. The question arises as to the state of the digital economy in Africa in the face of these new competitive practices and whether regulation of competition in Africa takes them into account.

Hong Kong Judgment affirms importance of properly documenting repatriation terms

26 April 2021

In the recent Hong Kong case of *Zhang Qiang v Cisco Systems (HK) Ltd* (HCA 1497/2010) [2021] HKCFI 694, the Court of First Instance upheld the binding nature of a repatriation agreement which meant a particularly uncooperative employee was not entitled to receive significant sums in connection with his repatriation back to Hong Kong.

The UK-EU Trade and Cooperation Agreement: Implications for technology services

11 January 2021

The TCA includes a chapter relating to digital services which provides some key details relevant to both providers and customers of technology-related services.

Boardroom Brexit: What the deal means for business

31 December 2020

[BOARDROOM BREXIT](#)

Welcome to this last edition of Boardroom Brexit, marking the end of the negotiations and the agreement of a new trade deal, the UK-EU Trade and Cooperation Agreement (TCA). In this edition, we summarise the impact of the deal on all aspects of business operations in one place – please use the hyperlinks below to help you navigate the report.

Boardroom Brexit: What the deal means for intellectual property

31 December 2020

[BOARDROOM BREXIT](#)

The TCA is not radical in terms of its immediate impact on holders of IP rights in the UK or the EU. It does not, for example, affect the post-2020 status of EU trade marks in the UK.

Boardroom Brexit: What the deal means for personal data and digital trade

31 December 2020

[BOARDROOM BREXIT](#)

The TCA allows personal data to transfer from the EU-UK, for a period of up to six months from 1 January 2021. This 'bridging' period is designed to allow the EU time needed to adopt a formal adequacy decision which will allow the continuing flow of personal data to the UK.

Boardroom Brexit: What the deal means for trade in services

31 December 2020

[BOARDROOM BREXIT](#)

The TCA has substantial sectoral coverage, including professional and business services (e.g. legal, auditing, architectural services), delivery and telecommunication services, computer-related and digital services, financial services, research and development services, most transport services and environmental services.

Japan exempts virtual currencies from consumption tax

31 MAR 2017

Comparable treatment can be found in Europe, where EU member states exempt virtual currencies from taxation as a result of a CJEU ruling.

Artificial intelligence: patentability of an interface between the human brain and a computer

30 MAR 2017

Drafted appropriately, inventions that allow interaction between the human brain and a computer can indeed be patent-eligible.

European Commission tackles financing risks linked to virtual currencies

13 SEP 2016

The proposal seeks to bring greater transparency to the virtual currency market in the European Union by imposing customer due diligence requirements on certain market participants, now considered "obligated entities."

Can blockchain live up to the hype?

28 JUL 2016

Is blockchain the revolutionary technology that will rewrite the rules for the finance industry, identifying authenticity and verifying payment flows that arise at a business-to-business level or between business and consumers and peer-to-peer? The consequences of the blockchain evolution would significantly open the field for technology platforms and reduce operational costs.

Global Financial Markets Insight - Issue 10, 2016

28 JUL 2016

FINANCE AND MARKETS GLOBAL INSIGHT

On 23 June 2016, the UK electorate voted to leave the European Union in a so-called Brexit referendum. The exit result was a surprise for many working in the finance sector. The change will impact the position of the UK under critical legislation such as the Capital Requirements Regulation, European Market Infrastructure Regulation, Market Abuse Regulation and many other Regulations and

Treaties applicable in the UK. We will also see a change as to the role of the UK in significant market initiatives such as the Capital Markets Union. It is likely that these changes will present both threats and opportunities. Until policy is clearer, we will comment on some of the existing challenges caused by EMIR and similar EU Regulations.

EU: new obligations for digital services providers and operators of essential services

28 JUN 2016

In line with the EU's broader Cyber Security Strategy, the NIS Directive is a significant step towards a more secure cross-border cyberspace with a high shared level of network and information system security.

Sustainability and ESG

The global technology sector is poised to lead the transition to a sustainable future. Technology companies are accustomed to thinking ahead of the curve and innovating on Sustainability and Environmental, Social and Governance (ESG) issues in order to gain a market advantage and provide solutions to global social issues such as environmental issues and workplace diversity.

Pursuing sustainability is a relentless and complex process in which the yardsticks for success are constantly evolving. For smaller companies, aligning their business objectives with their sustainability vision is not always enough to ease the demands for commitments to ESG. For example, a company which develops renewable energy technologies may have a strong environmental sustainability agenda but still have gaps in its handling of wider social issues such as employment practices and community engagement. For larger companies there is an increasing expectation to not only maximize shareholder value but take a broader role in addressing society's most pressing issues.

ETHICS AND INNOVATION

With businesses collecting more data, their understanding of consumers, employees and supply chains is changing. As businesses considerations account for both their investment performance as well as their social performance there is a convergence of business and human rights agendas. Issues related to business ethics, data management, privacy concerns, consumer litigation risks, and regulatory compliance are now all in play. High-profile data breaches in the industry have also heightened concerns not just about the security of data but the applications from it. Technology companies need to build the trust of stakeholders - for example, by improving data governance through audit processes to assure the integrity of data and by increasing accountability and transparency in use of consumer data. Other ethical issues concern fairness and influence. For example, AI and robotics can be used help to eliminate bias in hiring processes but, at a time when the focus on ensuring diversity has never been greater, AI learning has also been shown to foster implicit gender and racial bias.

EMERGING COMPANIES AND VENTURE CAPITAL INVESTMENT

Corporate investors are investing heavily in emerging companies that seize upon the opportunities ESG issues present. And start-ups understand that integrating ESG policies and practices into their business models allows them to attract these investments and create brand recognition, while laying the foundations for long-term value and growth.

ENVIRONMENTAL SUSTAINABILITY

Technology is essential for the transition to a net-zero low-carbon future. Innovations in cleantech, autonomous vehicles and drones may play a leading role in reducing greenhouse gas emissions, improving on energy efficiency, accelerating demand for renewable energy, and finding solutions for the transformation of our energy systems. A familiar example: digitalization and cloud storage services are transforming business operations by reducing paper usage. The latest iteration of our biannual tech research survey, the European Technology Index 2020, reported that energy-efficient technologies are a key area of interest and growth in the sector.

However, while digital technologies are improving, they continue to face environmental issues, such as energy consumption, materials sourcing issues such as mining of rare minerals, and disposal of unrecyclable e-waste. The pressure to resolve these issues has been growing exponentially as technology integrates more thoroughly into our lives. Pressured by consumers, some companies are striving to mitigate environmental risks through improved product design, closer supply chain oversight and product life cycle management.

DIVERSITY IN TECH

Recent years have seen a marked trend in company responses to improving diversity and inclusion in the technology sector. As discussed in our recent TechLaw Podcasts, data-based findings revealing stark gaps in representation in major technology companies have driven policy shifts, public disclosures and changes in investment strategy across the sector. In particular, there has been a push to address the lack of gender representation both at the board level and in the workforce.

THE DLA PIPER ADVANTAGE

DLA Piper's global technology sector assists companies of all sizes, from fledgling startups to global giants, wherever they are in their SESG journey. We partner with our clients to help them meet their SESG objectives, manage potential risks and leverage opportunities, and provide legal support in such areas as:

- Corporate Venture
- Data Protection, Privacy, and Security
- Emerging Growth and Venture Capital
- Global Governance and Compliance
- Public Company Corporate Governance
- Regulatory and Government Affairs
- Technology Transactions and Strategic Sourcing

In addition, our team of DLA Piper attorneys has extensive experience working with clients dedicated to SESG across the technology sector including:

- Agtech
- Artificial Intelligence
- Autonomous Vehicles
- Blockchain
- Cleantech
- Digital Transformation
- Edtech
- Fintech
- Healthtech
- Internet of Things

To discuss the implications of these issues for your business, please contact our ESG leaders.
